This surious Work was written by Bishop Fleetwood.

Chronicon Preciofum : OR, AN ACCOUNT OF English Money, THE PRICE of CORN, AND Other Commodities, For the last 600 Years. By Bishop Gibson. IN A LETTER to a Student IN THE University of Oxford. L O N D O N, Printed for Charles Darver, at the Flower-deluce, over-against St. Dunstan's Church, in Fleetstreet. M DCC VII.

THE PREFACE TO THE READER.

HEN I had set down, in the First Chapter, the Reason and Occasion of writing this little Book; and, in the following Ones had given the Proofs of my Determination; and, in the Last, had shewn the Use and Application of them, I thought I had made an end of my Busines.

But the Bookfeller, it seems, is of the Opmion, that I should not shew my felf Respectful enough to you, unless I introduced you, by the way of Preface. A 2 To

The PREFACE

To comply, therefore, with his Defires, I must needs think of saying something, tho' it be but to discover some of the Imperfections of this Book.

The Chapters then, of Money, might have been much more compleat, by the Addition of 5, or 6 Plates of the several Coins we have had, since the Conquest. Of the Golden Ones, I despair of ever seeing a Collection, of any tolerable Antiquity; since they who are best, as I hear, provided of these Treasures, can rise no higher than Ed. III. And for my own Part, I have never feen any one Piece, older than H. VI. and that was, I believe, a French one too: And I am confident, that to a common Curiosity, a Piece of Gold, older than the last Edward, will appear a very great Rarity. And yet, for full Five hundred Years fince the Conquest, one may well imagine, that most of

to the READER.

of the great Payments must have been made in Gold; fince (as I think, I have made appear) for 300 Years after that Time, there were no other Silver Pieces coined, than Pence, Half-Pence, and Farthings : and for 150 Years next after, there were no other than a Groat and Half Groat. Henry VII. being the first that ever coin'd a Shilling, and that too at the latter end of his Reign, and but a very few of them: So that when you read (out of that Paffage of Gervale of Tilbury, cited at large by * Mr. Lowndes, * In his and whom I have, by Mistake, in Page 69, cited as writing in the Time of H. I. inflead of H. II.) fub omnium Oculis effundit in Scaccario xxiiii Solidos, quos de Acervo sumptos prius fignaverit. And a little after, Reliquos verò xxiiii Solidos mittit in Loculum. When, I fay, you read thefe Passages, and others like them, in A. 3 ancient

The PREFACE

ancient Writers of the English Affairs, you are not to conclude that there was then any such Piece as a Shilling coined, no more than you would conclude there was fuch a Coin as a Pound, tho' you often meet with the word Libra. Upon the whole Matter, till about \$544, the Silver Money of England confifted of Groats, Half-Groats, Pence, Half-Pence (called, of old, Mails) and Farthings -: In any, or all, of which Pieces, it must have been very trouble-Some, to have paid 5, or 10 thousand Pounds : which makes it somewhat strange, that no more Gold of Ancient Kings should be preserv'd among us. But so, the Antiquaries tell us, it is with Grecian and with Roman Pieces, there being 40 Medals preserv'd, for one Piece of Currant Coin, that we can be fure of. So that the best Reafon, why we have fo few old Gold Coins remaining with us, feems to be, because they

to the READER.

they were (as we call them) Currant, i. e. they might be eafily spent.

But this that has been faid, makes it appear, that a small Place or two would hold the Coins of Silver, of 300 Years. For the Coins of W. Conq. W. II. H. I. Stephen, H. II. R. I. John, H. III. Ed. I. Ed. II. were only Pence, Half-Pence, and Farthings. The Coins of Ed. III. R. II. H. IV. H. V. H. VI. Ed. IV. R. III. were only Groats, Half-Groats, Pence, Half-Pence, and Farthings. H. VII. (as is above-faid) added to this Number, the Shilling, which is, I believe, hard to meet with. H. VIII. added no new Species, but, in his later Life, debased all the old ones. Ed. VI. debased them yet more, but in his last Year, made great amends, and added Crowns, Half-Crowns, Six-Pences, and Three-Pences, (10 that I have mistaken, Page 42. in Jaying Three-Pences were first coined A A by

The PREFACE

by Q. Elizab.) As to the Coins of the Princes following, they have been in almost every Bodies Hands : but yet the Memory of their Weight, Finenels, and Compass, ought to be preferved to Pofterity, much better than 'tis like to be. And we see the Necessity of the late new Coinage, hath almost obliterated the Names of E. VI. Q Mary, Q. Eliz. Jac. I. and C. I. already. So that an 100 Years hence, it will be hard to know, what fort of Money, was coined by Them; which would be great Pity, fince they coined excellent Money, both for Weight and Finenes, which is both to the Advantage and Honour of a Nation. This Evil, I once thought to have remedied; but the Trouble of procuring, rather than the Charge of cutting a single Piece of each Prince, fince the Conquest, was, I found, too great for Juch a One as I am : and whoever attempts it, must be obliged to

to the READER.

to abundance of curious Perfons, who have these Coins in their private Cabinets. And I here bespeak their Favour, if I should ever have Time and Power to undertake it.

I have also, in the Second Chapter, omitted all Quarter-Pieces of Gold, of whatever Denomination, because they will be easily known, by knowing the whole: as also the 5 l. and the 2 l. Pieces of Gold of Ch. II. and the 3 l. Pieces of Ch. I. and some other such like, because they rather seem to have been Medals, than Currant Coin.

As to the Chapter of Prices, it will be in every Body's Power, to make it more compleat, by reading the old Computus's, that he shall chance to light upon, and inserting what he finds wanting, or differing from the Accounts, that I have given : but most especially the Gentlemen of each University,

The PREFACE

versity, will have it in their Hands, to make what Amendments they shall see good, out of their old Rolls, and Burstars Accounts; which I look upon as the most sure Guides, in Enquiries of this Nature; because our General Histories do mostly give us the Prices of Things, which are extraordinary, either for Cheapnels, or for Dearnels. Whereas the College-Accounts, deliver faithfully the ordinary and common Price of most Commodities, and Provisions.

One Thing more I must observe to you; That the Nature of the Work obliged me, I thought, to set down the Names of the Authors, out of which I collected, the Materials of this Book; as well to justifie my self, as that you may recur to the Originals, whenever you please, in the particular Years : as also to avert, a little, that Scorn, with which

to the READER.

which some, in their supercilious Gravity, may persue the Collectors of such light and trivial Matters; when they shall find, that no English Historian, of any tolerable esteem among us, bath failed to make Observations of the like nature. Nay, some considerable Ones, have made it so much their Busines, that they seldom conclude a Year without informing us, whether it were, a dear, or a cheap one.

This Remark, will also help to remove, the Ostentation of much Reading, because there is no need of reading an Author throughout, to find what I have here discovered; the Method of many of them, making it easier to do so, by setting down (as I faid) the Price of Corn, and other Provisions, at the End of every Year. But so far I must needs ostentate my Reading, as to assure you, that I have viewed with my own Eyes, and transcribed from all the Origi-

The PREFACE

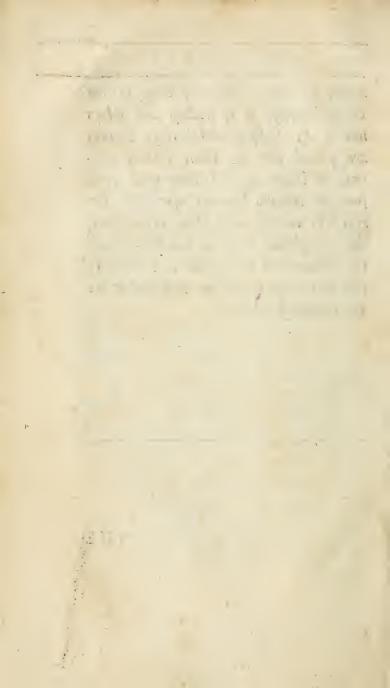

Originals, whatever I have set down; even many Particulars, which I have been content to give you very often, in honest Mr. Stow's English.

But, after all the Care I could take, I am sensible, there must needs be many Faults, and many Mistakes, in a Work of this Nature; and One 1 have already found, which I think my felf obliged to retract, in this Place, because it is too late to do it in its proper One; and that is, a Cenfure I paffed on Mr. Speed's giving us (o many Two-Pences, and Three-Pences of Saxon Kings, and some others, since the Conquest. I was led into it, (as others have been) by thinking he intended to mark Two Pences, and Three-Pences by the Figures of 2 and 3, which, I am now senfible, be intended for another Purpofe. And therefore, as it would be an Error in any One, to think those Pieces were coin'd so early, so I must needs acquit

to the READER.

acquit Mr. Speed, either of being in that Error him/elf, or of leading any others into it by Defign, altho' thofe Figures are placed over the Coins I there mention in Page 43. I have made some fort of Amends however, for these Errors, by taking more than usual Care, that you should have as few Errata's of the Printer, as is possible in a Work of this sort, and which you will find at the Beginning of the Book.

Ί

OR, AN ACCOUNT

OF

English Money, Corn, &c.

CHAP. I.

The CASE.

HE Statutes of a certain College (to the Observation of which, every one is sworn, when admitted Fellow) vacating a Fellowship, if the Fellow has an Estate in Land of Inheritance, or a perpetual Pension, of Five Pounds per An. I defire you would be pleased, to give me your Answer to these following Quessions; when I have first told you, that the College was founded between the Years 1440, and 1460.

- I. Whether He who is posseled of an Estate, of that, or greater Value, may make it over *in trust* to his Friend, and then fafely swear to the Observation of such Statute, amongst the rest?
- II. Whether He who has not an Eflate of that Value, when admitted Fellow, may keep his Fellowship tho he afterwards come to an Eflate of that, or much greater Value?
- III. Whether He who is actually poffeffed of an Effate, of Six Pounds per An. as Money, and Things go now, may fafely take that Oath, upon prefumption, that VI *l*. now, is not worth what V *l*. was, when that Statute was made.

The Anfwer to your First Question, may be easily had, by your asking your felf another, viz. Whether that Estate, tho' made over to another, be not still yours, as to the Profits of it, for the prefent, and as to the Disposal of it, for the future? If it be, How can you safely fwear it is not yours, when you have it

Thzonicon Pzeciolum.

to all Intents and Purpofes ? A Man may have a legal Title to an Effate, and yet not be Possessor of it, nor receive any Fruits of it; he may be outed by Vio-lence; it may be entirely mortgaged; or fequestred for payment of Debts; and during fuch Violence, Mortgage, or Sequefration, he may fafely fwear, he is worth but fo much as he truly and indeed receives, and nothing more, let the Effate be never fo great in it felf. And fuch an Oath as yours has not Respect to the Title alone, but to the Title with the Profits of an Estate. And since the making over your Estate, does not, (nor do you intend it should) defeat you of either, How can you fave your Oath, by making over the Title of it, and that, it may be, only for the prefent? No Man but He who has a mind to it, can be deceived by fuch Collusion. If an Act of Parliament should discharge all Debtors, who would fwear they were not worth five Pounds, would you believe your Debtor an honeft Man, who should take such an Oath, when you knew he had an Eflate fufficient to difcharge his Obligations to you, but had made it over to another, only to defeat his Creditors ? Aslure your felf, fuch making over your Estate, would B 2 not

4

not preferve you from the Guilt of Perjury, neither before God, nor good Men, tho' you would fwear true according to the Letter. We lately heard of a Man, who, to fave himfelf, from paying a certain Summ, asless'd by Act of Parliament, made over a great Treasure to his Neighbour (ignorant of the Matter) and locked him fafely up in his Clofet, till he came into the Court, and took his Oath he had not fo much Money in the World; and then came back, fet his Neighbour at Liberty, and took his Treasure again into his own Poffession. All who heard it, faid he was a perjured Villain, and tho' he had eluded the Law, yet he remain'd a Debtor to God's Justice, which would certainly find him out. This was the extremest Impudence that could be practifed ; but assure your felf, all Collusions of this kind, are as great Prophanations of an Oath as his was. They who make over the Titles of an Estate, and yet referve the Profits, are, in the fight of God (as well as their own) as much Masters of those Estates, as if they had the Titles of them also in their Cabinets.

Your Second Question feems to require more Pains to antwer it, than the First. But

But it only seems so, for there is in Truth, but little Difficulty in it, if you confider never fo little, the plain and visible Intention of your Founder; which was, that no Body worth five Pounds per An. should be Fellow of his College : Why elfe fhould he require you, to declare, under an Oath, you would obey that Statute? 'Tis manifest, that if you had an Estate above that determined Value, you could not take that Oath; and, if you could not take that Oath, you could not be admitted Fellow. The having that Effate therefore, must of necessity hinder you, by the Founder's visible Intention, from being admitted Fellow; Will not the fame Intention therefore hinder you from contitinuing Fellow? I do not, however, directly charge with Perjury, fuch Continuation, unless you deny, or do industrioufly conceal, your having fuch an Effate; because I am not sure you are obliged (by Virtue of your general Oath) to vacate, of your own accord, your Fellowship, but to submit to the Directions, or Injunctions of your lawful Superiours, and the Judges appointed in fuch Cafes. But yet I think it fuch a Violation of that Statute, as I would not counfel you to venture on. And, it may be, another Case, B 2

Cafe, not much removed from this, may better clear up this Question. Suppose it appeared to be the Purpose of your Founder, that no married Man should be Fellow of his College, and that before Admission, every one were required to swear he was not married; Might One be married after such an Oath, and continue Fellow, honefly, and with a good Confeience ? I believe you will not think he might; but will rather conclude, that the Force of that Oath was, by the Founder intended to fecure his main Purpole, of having none but fingle Men Fellows of that Society; and that that Circumflance which would have prevented his Admiffion, would alto, at any time after exclude him. Thus, I believe, you would determine in any others Cafe, and without any Bias on your Mind; and yet fuch Oath does not, in Terms, directly take in future Time; but only favs, I am not married : I .m not worth fo much, &c.

Your Third and last Question will cost me more Pains, and you more Patience, before we come to the Conclusion; if we can come to any fatisfactory one at last. The Question would certainly need no Answer, if it were asked in gross, Whe-

Thronicon Preciolum.

Whether he who has VI Pounds per An. may fafely swear be has not V? When a Pound is, in both Places (and has been fo for more than 600 Years) XX s. but as you have qualified it, by diffinguilhing the Times, it will require both a good Casuist, and a pretty good Historian, to answer it absolutely, and to your Purpole; which is (as I take it) to know. of what Value you may now hold an Estate, with fafety to your Confcience, which is charged with the Observation of that Statute, which vacates the Fellowfhip of One who has an Effate of Inheritance, or a perpetual Pension of Cs. or V l. per An. A better Cafuilt, I own, you might eafily have found. But, it may be, you could not fo eafily have found One, who hath in his Readings, mademore Observations on the Price of Corn, and other Commodities, at different Times, than I have done, as you will perceive by reading this long Letter. So that, for ought I know, my Diligence may make you Amends for what want of Judgment may be found in me. And I do not fay this in Vanity and Oftenstation of my Labour, but because without a good share of Knowledge in these Matters, the best Cafuist in the World can B 4 never

8

never answer your Question sausfactorily. And indeed, as the World now goes, the greatest (tho' I will not think the best) part of Readers, will be rather apt to defpile, than to commend the Pains that are taken in making Collections of fo mean Things, as the Price of Wheat, and Oats, of Poultry, and fuch like Provisions: Tho', I hope, before I have done, to shew you, that the Observation of thefe little Things, may be of good ufe, in the Confideration of great Affairs. And when you shall find, that many a fingle Line, of this Letter, has coff me the looking over a great Book, you will rather think fit to commend my Industry, than to difparage fo many good Authors, out of whom I have gathered thefe Materials: 'At least, you will think I wan-ted no Good-will to do you Service, who have taken fuch Pains to fatisfie your Queflion, that if any ancient Greek or Latin Writer had taken the like, and left us fuch Collection, you would have had the Salmahus's, the Grævius's, and the Gronovii almost out of their Wits for very Joy. But I am now come to your Queftion, and must premile, before I fpeak to it, that whereas you fay your Statutes were made betwixt the Years 1440,

1440, and 1460. I must, to fave Labour, call this Space, the Reign of H. VI. tho' his Reign began 18 Years sooner.

I do affirm then, with the best Judgment I have, that I am ferioufly perfuaded, that, altho' you are actually pofsessed of an Estate of VI Pounds per An. as Money and Things go now, you may fafely take that Oath, upon Prelumption that VI Pound now, is not worth what V l. was then, when that Statute was first made. Because whoever swears, fwears to Things that are fignified by Words, and not to mere words. When a Word fignifies the fame thing now in effect, which it fignified 260 Years ago, then he who fwears to Words, fwears to the Things they fignifie; but when different Things are fignified by the fame Word, then he who knows that difference of Things, cannot help giving luch Word, its proper and intended fignification. A Pound (for inflance) will buy either more, or lefs Corn (take it which way you will) now, than it would in H. VI. time. A Pound is therefore of more or lefs Value now, than it was then: and the Value of a Pound is truly a Pound and its mere Name. It is not there

1- 2010-

fame Thing now, that it was in H. VI. time.

I with, I confess, with all my Heart, that all Oaths were fo contrived and fo worded, that they might be taken with the utmost plainness and simplicity; and that no Room or Occasion could be left for any mental Refervation, or Exception in the Mind: But I think it can never be: almost all Words are Equivocal: And it is impossible to fix a determin'd Sense, on the Denominations of Coin; when all Things purchafable with Money, are fo changeable and uncertain. I do not mean, that a Pound, a Mark, and a Shilling, might not be always fix'd, fo as to fignifie XX s. XIII s. IV d. and XII d. but that it never can be fo ordered, in this World, that a Man should always, 200 Years ago. and now, and 200 Years hence, purchace the fame Quantity of Corn, the fame Number of Chickens, and as many Yards of Cloth, at one Time as ano the , with a Pound, a Mark, or a Shilling. And I this cannot be, then I maintair, that a Pound, a Mark, and a Shilling, is not now he fame Thing with a Pound, a Mark, and a Shilling, 200 Years ago. And therefore I may fafely take my Oath, that, altho' I am worth VI !. as Money and

IO

and Things go now, yet I am not worth V l. as Money and Things went 260 Years ago, in the Days of H. VI. And if it be faid, that I must needs take the Words of my Oath in their Plain, Literal, and Grammatical Senfe; I answer, That fo I must, wherever I can; but in this Cafe, the Plain, Literal, and Grammatical Sense of Five Pounds, is not the fame, with what it was 260 Years ago. What shall I do then ? Shall I prefer the Plain, Literal, and Grammatical Senfe of Words at this prefent, before the Plain, Literal, and Grammatical Sense of the fame Words as it flood 260 Years ago; which, I am fure, was the Senfe of the Founder ? I grant, that if it were a Cafe in Law, I should be determin'd by the Senfe which the Words do bear at present; but as it is a Case of Conscience, I do roundly affirm, that V Pound, is not the fame Thing, at prefent, that V l. was in the Reign of H VI.

And that I may very honeftly have Regard to the Value of V l. 260 Years ago, will, I believe, appear evident from what I am going to fay; That the Founder intended the fame Eafe, and Favour to Those who should live in his College 260 Years after his Decease, as to Those who

who lived in his own Time. Now, they who lived in his Time, might, with V Pounds, purchase fo much Bread, so much Drink, Meat, Cloth, Firing, Books, and other Necessaries, or Conveniencies: I know not exactly how much nor is it material: I only fay, the founder in mded I might keep fuch an Efta e, as would fuffice to procure the fame Bread, Drink, Meat, Cloth, Books, &c. as the other might have procured for V ounds, 260 Years ago. But this I cannot pollibly do with VI Pounds, as Things go now, nor it may be, with four times as much. I may therefore have Regard (tho' in an Oath) to the value of Pounds at that time; and, unlets I have, I thall be in a much harder Condition, than he who lived fo long ago; which is what the Founder neither did, nor could intend. This Argument in general feems, to me, unanswerable; and if you apply it to Particulars, you will see its Force more clearly. Ule it, for Example, in the Bufinels of taking Degrees in the University, to which you know you are obliged, and without which a Fellowship must needs be vacated. A Degree might be taken 260 Years ago, at five times lefs Charge, than it can be at this Day; and if a Fellow

Chronicon Perciolum.

low must lose his Fellowship for want of a Degree, may it not very eafily come to pais, that he shall not be able to pay for that Degree, if he may not be worth more than V Pounds per An. as Money goes now ? Some Founders have, in Cafes of extream Poverty, made Allowances, for indigent and virtuous Scholars, towards the taking their Degrees : but if you look into those Statutes, you will find that those Allowances are (as Money and Degrees go now) fo very inconfiderable, that they fignifie little or nothing towards it. which yet in those early Days, would (with a little help of Friends) have been fufficient to the intended Purpofe. This is a clear Proof, that Regard both may and must be had, to the different Value of Money, at different Times; and that the Founder's visible Intention is better anfwered by fuch Regard, than it would be by a first and oblinate Adherence to the bare Letter of the Statute.

This Inconvenience (you may poffibly object) will follow, from departing from the prefert Value of a *Pound*, and having regard to what it was formerly; namely, That hereby too great a 'Liberty will be taken in Oaths of this Nature: Some will be apt to run the Matter too h gh,

high, and (by reason of the uncertainty we are in, what Proportion a Pound at present bears to a Pound in H. VI. time) may pretend to keep their Fellowship, with an Estate of great Value. And to this I answer, That, for ought I know, it will now and then happen, as you furmise; nor is there any one Rule that is not subject to Abuse. And therefore I do not prefume to fet out, with any Exactness, or Certainty, and much less to determine Politively, how great an Estate is, at present, equivalent to an Estate, of the fame Denomination 260 Years ago. I leave that to Others, to gather from the particular Accounts of Things that I shall give them, from our Hiftorians. And they who are concern'd, ought ferioufly to confider, that altho' a Pound in H. VI. Time, might be worth 4 or 5, or more, in our own Times, yet it was not worth 20 or 30. And therefore the uncertainty of its Value cannot encourage any reafonable Man, to advance it to an extravagant height. They who are the Guardians of your College-Statutes, cannot (I believe) tell you exactly, how much Land of Inberitance, or how great a yearly perpetual Pension, will now-a-days anfwer to V Pounds in H. VI. Reign: but yet

yet they can tell you that '60 or 70 l. per An, will be too much to keep together with a Fellowship, if it be Land of Inheritance, or a perpetual Pension. And furthermore (which is an Antwer to all Objections of this Kind, and a sufficient Restraint to all Exorbitance) these Gardians of your Statutes, have it in their Power (if it be fit to have it in their Will) to judge according to the Letter, and to determine that V Pounds, as Pounds do now go, shall be the limited Summ, which shall not be exceeded. For the Letter is the Judge's Rule, and the Sense he pleases to put upon that Letter, is that by which you are to be determined, without Appeal or Remedy, unlefs he fay that V l. is any thing lefs than an Cs. And tho' I believe they never will determine, in any fuch Cafe, without regard to Equity, and Reason, and comparing of Times, yet if they should, you would be obliged to abide by their Judgment. And therefore all I have faid, for can fay on this Head, is only to thew you, what I think may be lately done with respect to Equity, and a good Confcience: Not to exempt you from the Jurifdiction of your lawful Superiours, but to shew you what you may do as an hone.t

honest Man, tho' what you do, does not agree exactly with the *Letter* of the Statutes, to which you are obliged, nay (if you will) to shew you, what you may innocently do, even when you may be punished for so doing.

But fince I have faid, that great regard is to be had to the Founder's Intention. where, and as far as it appears; you may perhaps defire to know, from whence it comes to pass, that a Fellow is, without dispute, allowed to enjoy the Interest of Money, or the Profits of a Lease to a much greater value, than that of V Pounds per An, when the Intention of the Founder feems to be plainly defeated by fo doing ? I answer you, That the Intention of the Founder does not feem plainly to be defeated, by holding a Lease, or by receiving the Interest of Money; because of the uncertainty of this Provision: Your Money may be loft by many Accidents ; and if it should, then you are quite destitute, and undone: And a Lease is generally for a Term of Years, which you may chance to outlive, and then you may be in as ill a Condition : But Land of Inheritance, and a perpetual Pension, are as certain a Provision for Futurity, as the state of human Affairs will allow of. This,

This, you see, makes a great difference. But moreover, I do not fay, that you are to feek for the Founder's Intention any farther than it plainly appears in his Statutes; nor that you are obliged, in many Cafes, to argue from a Parity of Reason. Money was put out to Interest, and Leases were made, in the time of H. VI. and your Founder, who lived in his Reign, knew this very well, and therefore had it in his Power, to have mentioned, and excepted Interest and Leases, in his Statutes, had he fo pleafed; and not having made any such Exceptions, you have no Rea-fon to prefume, that his Intention was to except them, but to enjoy the Liberty he leaves you at. Where Law-givers are at Liberty to oblige and bind their Subjects, and may use what Terms and Words they pleafe, to fignifie fuch Obligation, their Words are prefumed to include no more than they express : their Silence neither profits, nor hurts any one, 'tis their express Words that do both.

Supposing therefore, that you are convinced, that you may innocently fwear to the Observation of the Statutes, and yet intend to keep your Fellowship, altho' you have an Estate of VI Pounds per An. upon Prefumption that VI Pounds C now-

now-a-days, are not equal to V Pounds 260 Years ago.

Supposing, I fay, this; I am now at Liberty to proceed to an Hiftorical Account of Money, and of the different Price of Corn, and other Commodities; that by understanding both, and comparing one with the other, you may be the better able, to determine what Proportion, a Pound, a Mark, a Shilling, or a Penny, now, bears to the fame Denominations many Years ago. For this Account of Money, you will be obliged to Fabian, and to Stow's Chronicle, to Sir H. Spelman, and others, but efpecially to Mr. Lowndes's Effay; I have only taken Leave and Pains to put Things into a Method which I thought better for my Purpofe, and more for the Reader's Satisfaction, than any of theirs would be. And first, of the feveral Names that you will often find in reading over our Hiftories, both Latin and English The Gold I have put Alphabetically, that Recourse may be had more eafily to them; the Silver, as better known, I fpeak of gradually, beginning at the highest, which is a Pound, and coming to a Farthing, which is the lowest English Coin we have; and of which we have had none made of Silver (that

Thzonicon Pzeciolum.

(that I can find) fince the 36 H. VIII. *i. e.* fince 1542; and those were certainly very bad, fince out of 6 Ounces of fine Silver, (together with 6 Ounces of Allay) there were made 2304 Farthings, the Pound (as then most abusively called) going at 48 s. All the Denominations of Gold, were actually coined, at the Times I have set down (and not fooner, that we can find.) But for the Silver, most of them were mere Names, and were never coin'd; which they were, I observe as I go along.

The Reader may perceive by this, that when he meets, in Hiftory, with the word Angels, Half-Angels, Farthing-Angels, or with any other Coin, he must observe what King's Reign he is in, to understand exactly what the Summ amounts to: for otherwise he will mistake. This I obferve to him, once for all, and go on.

Note, In 9 Jac. 1. by a Proclamation, Gold was raifed 2 s. per Pound. Cb. the First brought it again to the Standard of 1 Jac. 1.

The following Table is collected out of Mr. Lowndes's Accounts, which, tho' they differ in fome Points from Mr. Stow's, who also cites Records for fome of them, I cannot chuse but prefer, because of his Abilities and Opportunities of giving them most perfect. Premising first, that C_4 a Pound

a Pound of Gold, *Troy-Weight*, was divided into 24 Carats; and each Carat into 4 Grains: And that the Old Standard of *England* was, 23 Car. 3 Grains and a half of fine Gold, and half a Grain of Allay, which might be Silver or Copper.

So

26

So that the fame Pound of Gold which in 18 E. 3. 1344, was worth 13, or 14, or 15 Pound in Silver, is rifen, by degrees, to go for 44 l. 10 s. 00 d. and the Gold not quite fo fine neither. But if a Penny then, was worth our 3 Pence, and XX s. worth our LX s. then Gold and Silver have kept, pretty near, the fame Proportion to each other; for three times 15 l. make 45 l. which is but X s. more than a Pound of Gold now goes at.

CHAP.

27

CHAP. III.

An Account of Silver Money.

Jound, Libra, contains 12 Ounces: and tho' now it fignifies XX s. (when applied to Money) which is but the 3d. Part of a Pound in Weight, yet it is because XXs. did heretofore weigh a full Pound, or 12 Ounces. Each of thefe Ounces contained fo many Solidi or Shillings, and fo many Denarii or Pence, as they who govern'd the Money-Matters thought fit; sometimes more, and sometimes fewer. Dr. Hicks, in his most learned, useful, and laborious Work (much to his own, and to the Nations Honour) tells us, pag. III. Differt. Epistol. that the Saxon Pound contain'd LX Shillings. For this, he cites a Passage out of the Textus Roffensis; Ceorles Wergyld is Myrchalage CC Scill. Thegenes Weregyld is fix swa micel; that byth XII hundred Scill. Thonne bith Cyninges anfeald Wergyld, fix Thegena Wergyld, be Myrcanalage ; that is XXX thusend Sceata; that bith ealles CXX Punda. The English of which is, A Churles Weregyld is, by Mercian-Law

Law, 200 Shillings. A Thaines Weregild is fix times as much, *i. e.* 1200 Shil. And the King's fingle Wereguld is as much as the Weregyld of fix Thains; that is 30000 Sceata. Which is in all 120 Pound.

The very fame Words we find at the End of King Æthelstane's Laws, put out by Mr. Lambard; and afterwards by Mr. Whelock at Cambridge, 1644. pag. 56. excepting that it is faid here, that a Ceorles Weregyld is 266 Thrimsa, which make 200 Shillings, and then goes on, as above; now if a Churles Weregild be 200 s. and a Thains 1200 s: and a King's fix times as much, i. e. 7200 s. and this last Summ make but CXX Pound, it will follow, that there must go LX s. to the Pound, because 120 multiplied by 60, produces 7200 s. But if, as is here faid, 266 Thrimfa make 200 Shillings, and (as is faid in the fame place, pag. 55.) that a King's Weregyld is among the English 30 Thousand Thrimsa: then there will be found in 30000 Thrimse, just 22400s. and 208 Thrimfæ remaining, which will make above 373 l. tho' you should allow 60 s. to the Pound; which is near to 3 times the Summ it ought to be. And if Thrimfa be (as that learned Perfon con-

concludes) 4 d. of Saxon Money, then thirty thousand Thrim (æ will make 400 %. allowing 60 s. to each Pound, which is more than 3 times 120% fo that nothing can be done with Thrim(a, if 266 of them make 200 s. Now if we will allow but of a Mistake (not great in it self) of CXX for CL, all things will go well, and the Saxon Pound will continue, as it has all along been counted, to be made up of 48 Shillings: for 150 multiplied by 48, makes just 7200s. which is the King's Weregyld. There is also Reason to believe, that in King Cnute's Time (who reign'd from 1017, to 1035,) the Saxon Pound continued at 48 s. because in his 3d Law, it is faid that he who breaks the Kings Peace in a Head Church, is to forleit V l. If in a Second Rate Church, 1205. If in a less Church, (but where there is a Church-Yard or Burying Place) 60 s. If in a Country Church (Feld Cyric) where there is no Church-Yard, 30 s. Here you fee there is a gradual Diminution of the Mulct, V 1. 120, 60, 30, s. from whence I conclude that V l. was just double to 120 s. that is, it was 240 s. which will make V 1. at 48 s. the Pound; and it will not be double to 120 s. by any other Reckoning. To this, let me add, that Mr.

Mr. Cambden, Sir H. Spelman, in his Glof-Sary, and Mr. Lambard in his, do all of them agree, that the Saxon Pound was made up of 48 s. and give no Intimation that it was ever otherwife, either more or lefs. I do not pretend, however, that Dr. Hicks has not other Authorities, befides what is above-cited, for what he affirms; for he is fo well skilled in these Matters, and has taken fo much Pains ja them, that he is not likely to fay a Thing that feems fo new, without good Reafon. Let it then be faid, that a Saxon Pound, did sometimes contain LX s. but generally 48 s. and each Shilling contained 5 d. fo that a Pound, or Libra Anglo-Saxonica, contained 240 d. How long it continued thus, I cannot tell exactly, but in the Laws, which are called King Edward's; 31. it is faid, In Danelega, the Forfeiture for Breach of Peace, was VIII /. which was raifed by the Hundred. Of this VIII 1. the King received 100 s. the Sheriff 50 s. and the Bishops Decanus (in whofe Deanry the Peace was broken) the other 10 s. From whence it is clear, that VIII 1. contained 160 s. which is 20 s. per Pound. But because 'tis manifest, from the 3d Law, that this Collection of Edward's Laws was made after W. Rufus's

fus's Time (fince there is mention made of him, by Name, in it) it will be better to fay, that the Pound contain'd XX s. in William the Conqueror's Time ; because in the IVth of his Laws, In Lege Danorum, foris factura est VIII lib. XX Solidi pro Capite, & VII libræ Regi. In Danelagh, the Forfeiture is 8 l. 20 s. for the Head, and 7 l. for the King. And in 79 of H. I. Infractio Pacis Regis V lib. in Anglorum Lege. Media L s. & adhuc minoris, ubi parva Parochia est, & Atrium cum sit XXV s. & Campestris Capellæ, ubi non fit Atrium, XII s. VI d. which is King Cnute's Law (above-recited) turn'd into Latin, and the Rates reduced to the Money then current : which confirms my Conjecture, that V l. was, there, double to 120 s. because it is here double to 50 s. And whoever looks into the Laws of King Ina, Alfred, and others, and finds the fame Proportions of 120, 60, & 30 s. fo oft observed in the Fines or Forfeitures of Offenders, will be apt to conclude that the Pound was then 48 s.

There is alfo fome difpute, whether the Pound was made up of 12, or of 15 Ounces. In the 30th of King Ethelred's Laws (as they are in J. Brompton) you will find thefe Words; Let those who overlook

look the Ports, see, that every Weight at the Market, be the Weight by which my Money is received, and let each of them be marked, so that 15 Oræmake a Pound. And in Sir H. Spelman's Glossary, you will find that Ora fignifies Uncia, and fo in other learned Authors. But the fame most learned Knight tells us, that Ora was also a Piece of Money, valued 16 d. for which he cites this Paffage. Plac. coram Rege T. Mich. 37. H.3. Rot. 4. The Men of Berkeholt, Com. Suffolc. Say, that in the time of King Henry, the Grand-Father of our present Lord the King, they had a Custom, that when they would marry out their Daughters. they were wont to pay, for Leave fo to do, 2 Orx. which are valued at 32 d. Now 15 Oræ make just a Saxon Pound, 48 s. or 15 times 16 Oræ make 240 d. There is therefore no need of faying that Ora fignifies an Ounce in King Ethelred's Law, nor in the fame Law renewed by King Cnute. (but which ought to be corrected by the Law of Ethelred, for instead of ad Mercatum, it is corruptly written admetatum.) Mr. Somner indeed (to whole Judgment great regard is to be had in all these Matters) is of the Opinion, that there was never any fuch Piece of Money as an Ora, but that it always fignifies an Ounce, of

of which he fays there were two forts, the one containing 16 Den. the other 20, (of which there is fo frequent mention made in the Dooms-day-Book) which was called the greater Ounce. But then he agrees that there were but 12 Ounces in the Pound, which can hardly be reconciled with Ethelred's Law. For if 15 Oræ are to make a Pound, and Ora be an Ounce, there will unavoidably be 15 Ounces in the Pound. And befides, he afterwards observes (from Mr. Cambden, out of Registr. Burton) that 20 Oræ are faid to be of equal value with 2 Marks of Silver. Now a Mark is 8 Ounces, (when XX s. make a Pound in weight) and 2 Marks are 16 Ounces (which he values at XXVI s. VIII d.) and if 20 Oræ be 20 Ounces (as they must, if Ora be necessarily an Ounce) then 20 Ounces, are of equal value with 16 Ounces; which may be true of the Pence that are made of an Ounce, but can hardly be true of the Name or Denomination of an Ounce. 12 Ounces, indeed, of 20 d. are equal to 15 Ounces of 16 d. But he who fays that 12 Ounces are equal to 15 Ounces, must understand something which his words do neither express nor imply. It will never therefore be true, that Ora should always fignifie D

fignifie an Ounce; that there should be 15 Oræ in a Pound, and yet that there should be but 12 Ounces in the Pound. Whenever therefore it is faid, that there are 12 Oræ in a Pound, there Ora is 20 d. Whenever there are 15 Oræ in a Pound, then Ora is 16 d. Verelius in his Lexicon Scandicum, fays, Ore, Solidus, & tertia pars Solidi. And Dolmerus (as he is cited by Du Fresne) fays, Ora, vernacula Aura, Danis Ore, suit olim genus monetæ, valens 15 Minuta. Which would make one think it a Denomination of Money, rather than of Weight.

It was a good Law of King Edgar, that there should be the fame Money, the fame Weight, and the fame Mealures, throughout the Kingdom : but it was never well observed. What can be more vexatious and unprofitable, both to Men of Reading and of Practice, than to find, that when they go out of one County, into another, they must learn a new Language, or cannot buy or fell any Thing? An Acre is not an Acre; nor a Bushel a Buschell, if you travail but ten Miles. A Pound is not a Pound, if you go from a Goldsmith to a Grocer; nor a Gallon a Gallon, if you go from the Ale-House to the Tavern. What Purpose does this Variety ferve,

Theonicon Pecciolum.

ferve, or what Necessity is there, which the Difference of Price would not better answer and supply ? 'Tis impossible to fix the Price of an Acre of Land, or of a Quarter of Wheat, because Land is much better in one Country than another, and because the Price of Corn will depend upon the Plenty or the Scarcety of it, and that upon the Goodness or the Badnefs of the Soil and Seafons. But it is possible to determine how many Feet, or Tards, length and breadth, an Acre Ihall contain, in all Places alike; and poffible to determine how many Quarts a Bushel, and how many Bushel a Quarter shall contain, fo that every Body shall know these Things alike, and neither be mistaken nor imposed upon. These things, I know, have (fome of them) been determin'd by Laws; but Cuftom and Folly have made those Laws useles. And the Trouble that fuch Variety, hath often given to me, as well as others, will justifie this Digrettion. From which I now return to ipeak of Libra Angle Normanica; which contained XXs. and each Shilling contain'd, sometimes 16 d. but generally 20 d. made out of an Ounce. The Libra Denarierum, and the Libra Sterlingorum are the fame; their Ounce con-D 2 taining

Thionicon Preciosum.

36

taining 20 d. and in that they agree with the Saxon Pound, tho' they differ in the Number of Shillings. *M. Du Frefne* (not to be named without Honour) in Libra Gallica, fays, a Penny is the 20th Part of an Ounce; and that 12 d. make a Shilling, and 3 Ounces make 5 s. 'tis therefore the fame with Libra Anglo-Normanica. You will fee hereafter in the Table, how the Pound differed, by being divided into more or fewer Shillings. I need not obferve to you, I think, that there was never any coined Piece of Silver, that either weighed, or was called a Pound.

The next Denomination of Money, you will often meet with, is a Mark, which the Saxons call Mancus, Mancusa, Mearc, &c. and amongst them it came to XXX d. which was, of their Money, VIs. Thus in the Laws of H. I. c. 35. it is faid, XX Mancæ quæ faciunt Solidos L. Now you will wonder that 20 times 6 s. (i.e. 120 s.) should make but 50 s. unlefs you remember that the 120 are Anglo-Saxonic Shillings, and the 50 are Anglo-Normanic ones, and that each of them contain alike 600 Pence. Thus C 69. Debent reddi, secundum Legem, XXXs. ad manbotam; idem hodie quinque Marcæ. Here

' 37

Here both the XXX s. and the quinque Marcæ are Saxonic. for there are 5 times 6 in 30. And fo again, De Twelfhinds, i. e. Thaino, 120 S. qui faciunt 20 Marcas. In c. 34. Erga Hundredum XXX s. & V Denar. qui faciunt V Mancas, ut Solidus den. XII. computetur. Which brings the Mark to VIs. 1 d. In the 76 c. a Mark is but 4 s. 6 d. but I doubt not but it is a mistake; and, indeed, those Laws, as we have them now, are full of mistakes: It is great pity Mr. Somner's Corrections, Annotations, and Gloffary upon them, are not published, but lie obscurely in a private Library: the Labours of fo faithful and judicious an Antiquary are well worth the Cost that any noble Lover of this fort of Learning would be at in making them Publick, and would pay him with ample Praife and Honour. When a Mark came to be valued at XIII s. IIII d. I cannot tell with any exactness, but M. Paris in the Life of Guarinus Abb. cf S. Albans, in An. 1194, and in 1235, tells us that a Mark was then (1194) 13 s. 4 d. and fo it has continued to this Day, without any variation: how long before that, appears not. I must also observe here, that there never was any fuch Piece of Silver as a Mark coin'd; and I cannot D 3 find

38

find any mention made of any fuch Piece of Gold, fince the Norman Conquest; tho' probably there was, before, among the Saxons, with fome Mark or Signature upon it, for the English word to mark, does probably come from it, or that from the Verb.

Angel. There was never any fuch Piece of Silver coined; but becaufe the Golden Piece of that Name, was valued at X s. therefore X s. is called an Angel. And fo it is with the word

Moble. Which goes for VI s. VIII d. in Accounts : but there has not been any fuch Piece of Gold coined, at that Price, fince the 9 H.5. and when they were first coined by E. 3. 1344, they feem not to have been very acceptable to the Nation, for thus H. Knyton, pag. 2484. represents the Matter. About this time the Noble, Obolus, and Ferthing of Gold, began to go about, in the Kingdom; upon which, the Parliament ordained, that none of the Commons (hould be compelled in any Payments, to take above XX s. of this new Movey. This was not, becaufe the Gold was rot good (for it was very fine, and of the Old Standard) but becaute (as I imagine) poor People could not get it easily changed into Silver, and fo would be

be diffressed; for at this time there were no Silver Coins, but Pence, and Halfpence, and q " it being at the foonest, 5 Years before there were any Groats or Half-Groats coined: which was about 1349. I shall lose half a dozen Lines of my Common-Place-Book, if I may not, under this Head tell you, that in An. 1389, there were feven Coiners condemned and hanged, for bringing a Noble (not to 9 Pence, but) to X s. making thence 6 Quadrantes, or Farthings. A Noble of right contained 80 d. the Obolus, or Half contained 40 d. and the Quadrans or Farthing contained 20 d. But by these false Coiners, a Noble was brought to 120 d. the Ob. to 60 d. and the Qu. to 30 d. fo that there were 2 Quadrantes, above the 4 good ones; which was their Profit. Ed. 4. railed the Noble from VI s. VIII d. to X s. which, tho' it was good Gold, and called by another Name (a Rial) yet was not well accepted, but thought to be to the Prejudice of the Commonwealth; but for what Reafon I know not.

A **Crown.** The first Silver Coin of the value of V s. (that I can observe) was in Ed. VI. Days; the Name is old, but then it was always Gold.

Q 4

Dalf

40

balf Crowns. Of the fame Date with Crowns, and never before.

Shillings, Solidus. The Latin word is of most uncertain fignification, and to be determined by every particular Nation : but the word Scylling or Shilling, never fignified in England, but 5 Pence, with the Saxons, and 12 d. ever fince : when it went for 12 d. at first, is hard to fay. But, as common as this word is, in all Books, and all Accompts, yet there was never (that appears) any Piece of Silver of that Denomination coined in England till the Year 1504, when Fabian fays, A new Coin of Silver Groats, and Half-Groats, and Shillings with half-faces, was made. Stow fays, in the fame Year, A new Coin was by Parliament appointed, i.e. Groat and Half-Groat, which bare but half-faces. The same time also was coined a Groat, which was in value 12 d. but of these but a few were coined. He does not call them Shillings, but Fabian does, and he lived at that very time, and was an observing Citizen. However, the Name does not appear, in Mr. Lowndes's Accounts, till a great while after. But Stow fays, 6 E. 6. there were coin'd. a Piece of Silver of V s. a 2d. Piece of IIs. VId. a 2d Piece of a Shilling; a 4th VId. and of smaller Money,

ney, a Yenny of the Double Role, not Sterling but bale; a Half-Penny of the Single Role; and a Farthing with a Portclole. Alfo in 34 H.8. there were coin'd Testons of 12 d. but not called Shillings. 13 d. ob. 9 d. and 4 d. ob. were all Pieces that came from Scotland in the Reign of Jac. 1. (tho' fome of them were coin'd in England) and therefore I meddle not with them.

Teftons. Or, as we commonly call them, Testers, from a Head that was upon them, were coin'd (as is before faid) 34 H.8. Sir H. Spelman fays, they are a French Coin, of the value of 18 d. and he does not know, but they might have gone for as much in England. He fays it was Brass, and covered over with Silver, and went in H. 8. Days for 12 d. but I Ed. 6. it was brought down to 9 d. and then to 6 d. (which full retains the Name) and in An. 1559 to 4 d. ob. Stow fays there was a fecond fort of Testons, which in 1559 was cried down to 2 d. q. And a third fort that was made unpaffable at any Rate. 'Tis certain there were very good ones coined in E. 6. Time; and they have still continued under all Princes, under the fame Name, and are the ufefullest Pieces we have.

Gzoats.

Stoats. See of them, under a Penny. Groffus fignifies great; and a Groat was a great Piece with refpect to a Penny, which was but a 4th Part, and the greateft Piece (in all likelyhood) then coin'd.

Thue Dence. No mention made of them till 1561, when Queen Elizabeth coin'd them, with 6 d. 4 d. 2 d. 1 d. 1 ob. and ob. q. Pieces, and called in all the bafe Money in the Kingdom; and fet our Coin upon that noble Foot on which it now flands; which, becaufe it was of the greateft Benefit to the Nation, is one of the greateft Glories of her Reign; for those are the trueft and most lafting Honours, that are built upon the Publick Good, procured or preferved by Princes.

Denny, Denarius, was the first coined Piece of Silver we have notice of, and, for many Years the only one; in H. I. Days 'tis certain there were Half-Pence; and 9 Ed. 3. cap. 3. 'tis enacted, That no Sterling (i.e. Penny) Half-Penny, nor Farthing, should be melted down by the Goldsmiths; which is a good Proof, that there were, at that time (which was An. 1335) no other Pieces of Silver coined. And 4 II. 4. it was enacted, That one Third of the Silver coined, should be coined

coined into Half-Pence, and Farthings. A Penny was indeed fo much the Whole of the currant Coin of the Kingdom, that Denarius was the fame thing with Nummus, or Money: And therefore Simeon Dunelm, 1126, fays, the Men that were found to have made falle Money, i.e. Denarii not of pure Silver, were hanged. And (when it is any determined Summ that is spoken of) Nummus does generally fignifie a Penny. So Mr. Westim. An. 1095, fays, that tho' there were more than 300000 Men marching to the Holy Land, yet Provision was so plentiful that a Ram was fold at a Penny (uno Nummo) and an Ox at (12 Nummis) 12 d. Dr. Hicks (in his Differtatio Epistolaris, p. 109.) fays, that the Anglo Saxons, had but one Silver Coin among them, and that was a Penny. So fays Mr. Cambden, Sir H. Spelman, and most of our good Antiquaries. And therefore when we find the honest and industrious Mr. Speed, in his Chronicle, gives us the Three-Pences of fo many Saxon Kings, from Cheuline and Egbert, An. 562, down to Ed. the Confessor, the Two-Pence of Harold. And again, the Three-Pences of W. Con. W. 2. H. I. Stephen, H. 2. John, H. 3. and a Two-Pence of R. I. and that from the Treasury of that

44

that noble Antiquary Sir R. Cotton we have leave (for many Reasons) to think him mistaken; fince in our Histories we find no mention of any fuch Pieces as Three-Pences, before the beginning of Eliz. The Present State of England (which is an excellent Book, and to whofe Perfection every One should contribute, because it gives an Account of all our Affairs, both to Foreigners, and Natives) is alfo to be corrected in this Particular, when it fays, that in Ed. I. time 4 d. 3 d. and 2 d. were coin'd, which certainly is not true. But all the Observations I shall make on the Penny, will be beftowed, in some few Notes, upon a Passage, which I have transcribed from Mr. Stow in the Year 1279, as follows.

Whereas, before this time, the Penny was wont to have a double Crofs with a Creft, in fuch fort that the fame might be eafily broken in the midft, or into four quarters, and fo to be made into Half-Pence, or Farthings; which Order was taken in the Year of Chrift 1106, the 7 H. I. It was now (a) ordained, that Pence, Half-Pence, and Farthings, fhould be made Round; whereupon were made thefe Verfes following.

^e Edward

45

٤	Edward dia	Smite Round	, Penny,	Half-
	· Penny,	Farthing,		

- The Kings side, was his head and his Name written (b)
- ' The Croffe fide, what City it was in ' coyned and smitten.

"To Poor man, ne to Priest, the Penny frayses nothing,

- "Men give God, ay, the least; they feast bim with a farthing.
- ' A thousand, two bundred, fourscore ' years, and mo,

• On this Money men wondred, when it • first began to goe.

And befides thefe Moneys, there was
coined Groats (c) containing 4 d. the
Piece (for what follows, he quotes Regiftr. of Bury) the Pound of Efferling
Money, at this time, containing 12
Ounces; to wit, fine Silver (fuch as
Men make into Foyle or Leaves, and is
commonly called Silver of Gutherom
Lane) 11 Ounces, 2 Efferlings (d) and
one Ferling (e) and the other 17 d. ob.q.
to be Allay. Alfo the Pound ought to
weigh of Money XX s. and III d. by Accompt:

.46.

' compt: fo that no Pound ought to be

⁶ above 20 s. 4 d. nor less than 20 s. 2 d.

by Accompt. 'The Ounce is to weigh

⁶ 20 d. the Penny to weigh 24 Grains (1).

Thus far Mr. Stow; to which let me add to the Passages that are mark'd, as follows.

(a) It should seem by these Words, that Pence and Half-Pence were not Round, before this Year 1279, but they were certainly Round in H.I. time. For in 1108, Sim. Dunelm fays, the King appointed the Pence and Half-Pence should be all Round. And in 1180, Philip Aymary of Tours was fent for, to new coin the Money; which was done, and made all Round, as faith Radulf de Diceto. But, it may be, that Ed. I. was the first that appointed Farthings should be coin'd (like Pence and Half-Pence) Round. Tho. Walfingham 1280, and H. Knighton, p. 2678, agree with Mr. Westm. in 1279, to fay the fame thing; that becaufe the Penny was broken in half, to make 2 Oboli, and the Obeli again broken in halves, to make 4 Quadrantes or Farthings, it was ordained to coin the Oboli, and Quadrantes, Round; fo that the Opportunity of cutting from each Ob. or Quadr. was taken away.

away. And yet the fame T. Walfingham in 1278, reprefents Matters as if the Obolus had been diffinctly coined, before this, in the Shape of a Semicircle. Obolus qui prius formam habebat Semicirculi, tanquam pars Denarii in medio divisi, fit rotundus. Whereas, in truth, whenever it was in this Shape, it was certainly one half of a Penny, broken in funder.

(b) Name written. The Name of the King was indeed written, whether Will. Henricus, Ricardus, or Edvardus: But no Body, from thence, can tell whether it were W. I. or II. Hen. I, II, III, IV, V, VI. or Ed. I, II, III, IV. and, as far as I could ever find, H. VII. was the first that was to be certainly known by that Distinction, whose Name I have seen mark'd on a Silver Groat, Henric. VII. But in this I may be mistaken, having not seen all Coins, and yet enow to venture this Remark.

(c) Statts. This is the first time, that I have feen Groats mentioned to be coin'd, in 1279. And tho' I never suspect Mr. Stow's Faithfulness, or Industry, yet I believe he was here mistaken; as well, because in 9 E. 3. no mention is made of them, when Pence and Half-Pence are forbidden to be melted by the Goldsmith, fine:

48

fince the fame Reafon would have forbidden the melting down Groats (as afterwards was done 17 R.2.) which forbad the melting the others; as alfo because that Coin appears not in Mr. Lowndes's Accounts, before the 27 E. 3. which was in 1353, tho' Tho. Walfingham mentions them in 1351, but he feems not to have known there were ever any fuch Pieces before that Year : For in that Year, he fays, that, Wm. Edington Bp. of Winton, and L. Treasurer, a Man of great Prudence, but one who confulted more the King's Profit, than that of the Kingdom, found out, and coin'd new Pieces; i.e. Groflum & dimidium Groffi. Groats and Half-Groats. but of less weight than they ought to have heen. i.e. I suppose, they weighed not as much as 4 Penny's. After this, we meet with the Name often, and most commonly applied to 4 d. tho' (as I think) fometimes to more than 4 d. You may also fee that 2 d. was not called by the name Two-Pence, but a Half-Groat, or Half-Groz. And in 19 H. 7. Half-Groats are called Pence of Two-Pence. H. Knyton mentions Groffa in 1378, and fays it was 4 d. and fo much was given to the King for every Man and Woman.

(d) Ester-

(d) Esterlings. Here Sterling fignifies a Penny-weight, because it fignifies a Penny of fine Silver, which is now called Standard. And I have never, but once, feen Sterling (when it fignifies a Piece of Money) fland for any thing but a Penny, and that is, in Monasticon Angl. 2. Vol. p. 471. where it fignifies a Half-Penny: For there it is faid, that Hens were a Sterling a-piece; not in express Words, but by Consequence; for it is there faid, that Wheat was 2 s. the Quarter; and that the 6th Part of a Bulhel of Wheat was valued at a Sterling; now the Bushel is valued at 3 d. (when the Quarter is at 2 s.) and the 6th Part of 3 d. is a Half-Penny; and fo Sterling must be there a Half-Penny. This was, occasioned by Ed. 1. calling in Pollards, Crocards, or Cocodones, and Rojary's; all which were coined, and brought into England by Foreigners, and underhand went for Sterlings, (i.e. for Pence,) but in the Year 1301, were suffered to go but for Oboli, or Half-Pence; and that not long neither: for at Christmass they were called in, and made Oboli; and at Easter following they were cried down quite : But Corruptions are not to eafily parted with; they went currant among the Peo-E ple

ple longer, and retained still the name of Sterlings, tho' they went for but Half-Pence. H. Knyghton, p. 2493.

(e) Ferling, is a Farthing, or the 4th Part of a Sterling.

(f) The Penny-weight is here faid to contain 24 Grains; and fo it does to this Day. Yet Tho. Rudborn, in Hift. Maj. Winton. Anglia Sacra, V. I. p. 257. fays it was determined by W. Conq. 1083, that a Penny Sterling, round and unclipp'd, was to weigh 32 Grains. However, we are fure it was to determin'd by Act of Parl. 51 H. 3. and fo again, 12 H. 7. That every Sterling shall weigh 32 Grains of Wheat, that grew in the midst of the Ear of Wheat; and a Standard for the King's Treasury is to be made according to this Affize. To reconcile this Difference, 'tis probable, that 24 Grains, as they are Weights to weigh by, may be truly as heavy, as 32 Grains of Wheat ; which is as much as the Acts of Parliament require; and it would have been troublefome, to have made a Brafs Weight, no heavier than the 32d Part of a Penny.

Dualtia. Signifies an Half-Penny, or (as you have feen before) the half of any Thing. And as Denariatus Terræ fignifies a Perch of Land (or let it be any

iny other Measure, or Quantity) so Oboatus Terræ fignifies half that Land; and a Farthing (called also Fardella, Fardinglela, Farundel, and other Names, which ou may see in S. H. Spelman's Gloff.) figniies a quarter of it. So Acra, an Acre of and, contains (like a Mark in Money) 60 Den. 320 Ob. and 640 Quadrantes. ſ annot find, when Obolus, Half-Penny, was irst coined : but we may imagine it was coined, as early as ever we can find it nentioned, because it is not a Denomination, which may be answered by other Money (as a Pound by 20 s. if there had been any Shillings, or a Mark, by 135.4d. or a Shilling by 12 Pence) but it must be a diffinct coin'd Piece. And fo for Ferlingus, or Farthing. I shall make an

end when I have observed to you, that when you meet, in old Donations, with Such words as Librata Terræ, Marcata, Solidata, or Denariata, and the like, you are to understand as much Land as w.ll yield the Rent of a Pound, a Mark, a Shilling, or a Penny, by the Year.

E 2

Fere

Here follows a TABLE, by which you will perceive into how many Shillings, a Pound-weight of Silver has, at leveral times, been coin'd; together with its Allay, and what the Ounce was worth in common Effimation.

	Years.			Years. Finen.		Allay.		Shillings.		The Ounce worth.		
	28	E.				1		s. XX				d. 8 1/4

I can-

I cannot leave this Head, till I have taken notice of one or two Specialties relating to Coin. The first is, that when Sir Rob. Cotton was called to deliver his Opinion, touching the Alteration of the Coin, before the Lords of the Privy-Council in 2 Car. I. he lays great load on the Reign of H. VI. for milmanagement of this Affair of Money, as if it had fuffered some extraordinary Debasement, in his Time, and done him great Diffionour, and great Milchief in the Minds of his Subjects, and afforded his Rival (Rich. D. of Tork) an Occasion of high Complaint. And that when my Lord Treafurer Burleigh, and Sir Thomas Smith, were called upon by Queen Elizabeth, to deliver their Opinions about the change of Money, they advifed her to reduce the Standard to the ancient Parity and Purity of her Great-Grand-Father King Ed. IV. Upon this, I cannot but oblerve, that H.V. in the 9th of his Reign (according to Mr. Lowndes's Accounts) had raifed the Money to XXXs. the Pound; and that H. VI. in the first of his Reign, advanced it to XXXVII s. VI d. but keeping still to the Old Standard of Finenels (without a change of which, all other Changes feem to be but merely E 4 nomi-

nominal; for 37 s. and 6 d. will buy no more Wheat, than 30 s. will do when once People come to know there is no more fine Silver in 37 s. 6 d. than in 30 s.) but even this Change continued not long, for 2 H. VI. c. 13. upon Complaint made in Parliament, that there was a scarcety of white Money, by reason that Silver uncoined was bought and fold at XXXII s. the Pound Troy; whereas it was of no more value, when coin'd, than XXXII s. (12 d. abated for the Coinage) it was enacted that none should buy or sell any Silver uncoined for above XXX s. the Pound Troy, befides the Fashion. I will not anfwer for the Reafonableness of this Act; but it proves clearly that the Pound did not long contain 37 s. 6 d. and it app ars evidently, that 4 H. VI. it came again to XXX s. and fo continued to the very last Year of his Reign, when it was again advanced to 37 s. 6 d. and fo continued for near 50 Years. So that the greatest Debasement of King H. VI. was just equal to, and indeed the fame with, the Farity, and Purity of King Ed. IV.

The greatest Debasement of Money, is the greatest Allay, or Mixture of baser Metal with Silver (and that is only bad, because People are deceived by its looks, and

and know not how much fine Silver there is in fuch or fuch a Piece) and that was in 5 Ed. VI. when 9 Ounces of Allay were added to 3 Ounces of fine Silver, and coin'd into 72 Shillings; fo that a Pound of fine Silver, at that rate of Mixture, was coin'd into 288 s. or 14 l. 8 s. oo d. and the Ounce into 24 s. which was intollerable; and when in the Year following, this Bafe Money was called down, the People fuffered extreamly by it. I have by me, now, an Account of that Time, wherein, by the first Proclamation (dated July 9.) a College lost (out of an 118 l. 6 s. 11 d.) 29 l. 11 s. 8 d. ob. q. And by the second Proclamation (dated Aug. 17. immediately following) out of 45 l. 3 s. the College loft 15 l. 1 s. which was a 4th and a 3d Part of every One's Cash, in the Space of two Months. It will be much for the Honour of the late Reign, to have remedied the greatest Abuse of Money, that was ever known in England, at a time of the greatest Danger and Expence, with very little Grievance of the People. But, fure, 'tis better to prevent a moderate Mifchief, than redrefs a very great one; and, perhaps, a Proclamation of three or four Lines, forbidding any clipped Money to be

58

be received into the King's Exchequer, in 1690, would have prevented the clipping and spoiling 5 Millions. The second Thing I would observe, is, That an Hiftorian who lived in the Days of H.VI. and Ed. IV. tells us, that fuch was the Enmity of the Houfe of Tork, to that of Lancaster, that when Ed. IV. came to the Crown, not only all that was given and gotten, under the three foregoing Reigns of Henry IV, V, VI. was taken away; but that the Money alfo, as well Gold, as Silver, was changed and coined a-new, that the Name of Henry might be no more remembred. Sed & Moneta tam in Auro, quam Argento, ut Nomen in ea prorsus deleatur Henrici, similiter mutata est, & denuo fabricata. Continuatio Hist. Croyland, An. 1461. But Time hath made all even again, and left us as many Coins of the Henry's, as of Edward the IVth.

The laft Thing I would observe to you is, That tho' (as you see in the Table) the Pound was sometimes 22 s. 6 d. 25 s. 30 s. 37 s. 6 d. 45 s. 48 s. 72 s. 60 s. and 62 s. as it now stands. Yet, in Accompts, it always signified 20 s. just, and neither more nor less. When the Pound contain'd (for Example) 30 s. he who owed another Man Five Pounds, did not pay

pay him 150 s. but an 100. And 'tis as certain that an 100 s. fignified five Pounds at that time, and no lefs, as it does now. This must have been ever fince XX s. came to weigh, and to be call'd, a Pound. And fo it was with the Saxon Pound, that was always 48 s. And he who owed five Pounds, before the Norman Times, did certainly pay 240 s. which was, both in Weight and Denomination, five Pounds : Whereas five Pounds are now only fo in Name, and not in Weight. Let me end this Chapter, with giving you the Names (from Mr. Cambden) of feveral falle and finall Pieces, that were heretofore in ufe among our Fathers. In the Time of E. III. Crocards, Pollards, Rofaries, Cocadones, Stepings, and Staldings, were cried down. Gally-Half-Pence, which were brought hither by the Genoefe Gallies, cried down by H. IV. Suskins and Dedkins by H. V. and Blanks by H. VI. There were also little Pieces coined by H. VII. called Dandypratts, which, I suppose, were little and contemptible Things, because that Word has fince been used to fignifie fmall and worthlefs People.

3

CHAP.

60

CHAP. IV.

Of the Price of Corn, and other Commodities, for 600 Years last past.

Aving dispatch'd, with what exactness I could, the Chapters of Moneys, I am now come to fpeak to the Price of Corn and other Commodities; which is (whether you know it, or not) the readiest way to the Solution of your Third, and most material Question. For, your Business is to know (as near as you can) what Estate or Summ of Money will now-a-days be equal, or equivalent to five Pounds (let that be the supposed Summ in this Difcourse) in the Reign of King H. VI. and to this End, your Care will be, to find out how much Meat, Drink, or Cloth, might be purchased in H.VI. Reign, with V l, and then to find

out,

out, how much of the Money now current, will be required to purchase the fame quantity of Meat, Drink, and Cloth. For, fince Money is of no other use, than as it is the Thing with which we purchase the Necessaries and Conveniencies of Life, 'tis evident, that if V / in H.VI. Days, would purchase 5 Quarter of Wheat, 4 Hogsheads of Beer, and 6 Tards of Cloth, he who then had V l. in his Pocket, was full as rich a Man as he who has now XX l. if with that XX l. he can purchase no more Wheat, Beer, or Cloth, than the other. I do not mean hereby to pre-judge this to be the Proportion ; but use this Inflance to let you fee, that this is the propereft way of coming to know, what Estate is now most answerable, to an Estate of V l. per An. 250 Years ago. And tho' the comparing the Reign of

H, VI.

.61

H.VI. with your own Times, would be fufficient for your particular Purpose; yet fince I have made the fame Collections, for the Years foregoing, and for those which follow the Reign of H. VI. it will be (I believe) neither ungrateful nor unprofitable, to give them to the Reader; especially fince other Colleges, which may be under the like Obligation's, were founded, fome before, and some fince, the Reign of H. VI. It will be molt for the Reader's Use, and Eafe, that I fet down the Particulars in Order of Time; and if he shall chance to judge many of them to be trivial (as fome perhaps will judge them all to be) as ftanding by themfelves, I desire him to consider, that, in conjunction with the reft, they may be of some Moment; and that others may like to fee those very Particulars which he fo lit-

tle

63

tle efteems. As to the *Tear* of our Lord, (into which I change the *Tears of the Kings Reigns*) I will not pretend to be most exact; as well because I think it not much to the Purpose to be so, as also because each Year of a King's Reign, does unavoidably fall into two Years of our Lord, and if I hit either of them, or come very near them, it answers my Intention.

In King Ina's Laws, which were made betwixt 712, and 727, it is faid, Ovis cum Agno fuo valet unum Solidum, ufque ad XIII Nostes post Pascha. A Ewe, with her Lamb, is worth one Shilling, till 13 Nights after Easter. Bromton. Chr. 766. but instead of 13, it should be 14, as it is in the Saxon of Mr. Lambard.

Between the Years 900, and 1000, Ednoth bought 2 Hydes of Land at Stapleford (in Bedford/hire) for C. Shil.

of the best Silver, and gave them to Ramsey Abby. D. Gale's Hift. Rams. 415. and p. 471. Hift. Elienf. a Palfry was at X s. which was about the Year 966. And p. 473. an Acre of Land was purchased at 1 s. and a Hyde at C. s. from whence one might think, that a Hyde contained an 100 Acres, but it contained 120 Acres. And, once for all, you will do well to remember, that a Hyde, a Tard-Land, and a Knight's Fee, contains no certain Number of Acres, but differs according to different Places; as you may fee in the Gloffary's.

64

In the Senatus Confulta de Monticolis, in the Time of King Ethelred, about the Year 1000, if a Horfe be loft, the Compenfation must be 30 s. A Mare, or Colt of a Year old, 20 s. A Mule or young Affe at 12 s. An Ox at 30 d. A Cow 24 d. A Swine 8 d. A Man one

Pound.

Pound. A Sheep, i s. A Goat at 11 d. Note, That this is Saxon Money, 5 d. to the Shill. and 48 s. to the Pound. Whelock, p. 96.

In 1043, Chron. Saxon. Corn was so dear, as no One ever remembred it; infomuch that a Sefter of Wheat was fold for LX d. H. of Huntingdon explains this Sextarius, by faying it was as much as would load a Horse; and so does Rob. de Monte, in 1041. and both of them fay it was fold for V. Sol. And both of them lived about the Year, 1140. A Sefter or Sextarius was what we now call a 2 arter, or a Seam, containing 8 Bulhels. So Sir H. Spelman. And in Confirmation of it, cites Huntington, L. 6. Circa hoc tempus (scil. Ed. Confess.) tanta fames Angliam invalit quod Sextarius Frumenti, qui Equo uni solet este oneri, venundaretur 1' Solidis, & etiam plus. These

two

66

two Authors that wrote in Latin, and lived an 100 Years after, in the Norman Times, translated LX d. into V Sol. becaufe in their Days the Shilling contained 12 d. But in the Saxon Times, i. e. when this Famine or Scarcety happened, 1043, the Shilling contain'd but 5 d. fo that LX d. with the Saxons was XII Sol. So the Fragment of Ælfric Grammaticus (cited by Mr. Somner) who died, as Mr. Wharton thinks, in An. 1051, Anglia Sacr. P. I. Libra on Leden is Pund on Englisc, Fif Penegas gemacigath ænne Scillinge, & XXX Penega ænne Mancs. i. e. Libra in Latin is a Pound in English. Five Pennies make one Schilling, and 30 Pennies a Mark. A Mark was therefore VI Sol. as I have before obferved, because there are 6 times 5 in 30.

And it will not be amifs, to hint to you, on this Occafion, the neceffity there is of remembring how near,

your

your Author lived to the Times he writes of ; because most Men are apt to speak of Ages past, according to the Ways and Cultoms of their own. Thus, in the Laws of King Athelstan, as they are translated by John Brompton (inter X Scriptores) pag. 847. an Offender is to forfeit for his first Fault, XXX d. for his second, LX d. and for his third, X s. Now this could not poffibly be in King Athelstan's Time, when LX d. made XIIs. but in John Brompton's Time, (who lived under Edw. III.) X s. was double (as it still is) to LX d. and was a treble Mulf for a third Offence, as Reason required. And thus in L. 59, of King Ina. He who wounds or maims the Horn of an Ox, is to pay X d. [Brompton lays V d.] of a Cow, 2 d. [B. fays V d.] Who cuts off the Tail of an Ox, is to pay IV d. [B. fays V d.] of a Cow, V d. Whol Fz

puts

68

puts out the Eye of an Ox, is to pay V d. of a Cow, a Shilling. [Brompton fays 12d.] Now, tho' a Shilling in Brompton's Time had in it 12 d. yet in Ina's Time, it had but 5 d. I could give you many Inflances of this nature, if it were useful; but these (which are not alien from my Delign) may suffice to justifie the Caution I gave you, of minding your Author's Age. But, leaving you to take part, either with iny Conjectures, or with the two above-named Authors, Rob. de Monte, and H. Huntingdon. I fet down the Price of a Quarter of Wheat, in 1043, at -----

In 1125, a Sextar or Quarter of Wheat, at _____

So say Annales de Margan (put out by Dr. Gale) there was so great a Famine. But 14. Huntington in the same Year says, p. 382. Vendebatur Onus equi frumentarium, VI s. And Rob. de Monte, in

l. s. d. 00 00 60

01 00 00

the

the fame Year, fays it was the deareft Year in *England*, that was ever known; for a Horfe-load of Wheat was fold at VI Sol. This, upon the Credit of thefe two Writers, feems more likely, than the Price fet by the *Annalift*, of 20 s.

If the Liber niger Schaccarii, were written in the Time of *H*. I. as fome affirm, it ought to be noted down, in the next place, (fince he began 1100, and ended 1135.)

1. Pro Mensura Tritici ad Panem Centum Hominum.

2. Pro Corpore Bovis Pafcualis.

Pro Præbenda XX Equorum.

3. Pro Ariete vel Ove .---

1. This was the Exchange made by the King; that inftead of *Provisions* for his Houshold, he might have fome ready *Money* to defray the Expences of his Court, and pay his Soldiers. Inftead, therefore, of *Bread*

F 3

69

00 00 04

for

for a 100 Men (for one Meal, I suppose) the Tenant was to pay a Shilling.

70

2. Inftead of a stalled Ox, the Tenant was to pay a Shilling. Mr. Selden, in his Notes on Eadmer, says it was five Shillings. But Sir H. Spelman (in v. Firma) who faw the Book, and transcrib'd this Passage, puts it down Solidum unum; and him I follow. He fays, it is a Book on which the Sun does feldom fline; meaning, that it is rarely feen and hard to come at. He had the Opportunity of transcribing many Pieces of it, which he has given, in feveral places of his Gloffary; and fo has Mr. Lowndes transcribed a good deal of it, in his Esfay. But this is all that Fcould find to my present Purpose.

3. By *Provender* of Horfes is always meant *Oars*. And inflead of bringing Oats for XX Horfes (for a Night, 1)

ima

Thronicon Precis	olum. 71
imagine) the Tenant was to allow 4 Pence. In the Laws of H.I. cap. 76. Forty Sheep are valued at About the Year 1145. the Tenant of a Place was to pay yearly XX s. or VII	<i>l. s. d.</i> 01 00 00
Oxen, each worth III s. M. Paris, p. 1013. In 1185. The Tenants of Shireborn, are by Cuftom, to	
pay either 2 d. or 4 Hens, which they will. And by the Cuftom of Beleschall, they are to have a Ram, or VIII d.	
(and in the Preface to King Athelstan's Laws, a Ram was at 4 d. Vel unus Aries, qui valeat IIII Denarios.) Monast.	
V. II. p. 528. In 1196. So great a fcarce- ty of Corn that, at Salisbu- ry, a Sema of Wheat was	1
fold at In 1197. A Sema of Whcat	00 13 04
(<i>i.e.</i> a Quarter) at ——— <i>Tho.Wikes, Chron.</i> Dr. <i>Gale</i> (to whom we are obliged for the Edition of this, and	00 18 98
F4	other

other Hiftorians) put his Note under the word Semaquatuor modios. Which, furely, is not so; for Sema is a Quarter, or 8 Bushel. And fo Sir H. Spelman, Seam VIII modiorum mensura; sic de Frumento dictum, quod unius Equi sit Sauma, i. e. Sarcina. So that, with him, a Quarter of Wheat is a Horfeload. And, doubtless, a Quarter is a quarter or fourth Part of fome Load or Weight; for fo quarta, quartalis, and quartalium, fignifies a Peck or the fourth Part of a Bushel: and a Quart is the fourth Part of a Gallon.

72

In 1199. King John ordered that a Tun of Poictou-Wine, should be fold for no more than

A Tun of Anjou-Wine at

No French Wine above

Unless fo very good, that One would be glad to give, per Tun

Wine, to be fold above -----

l. s. d. 0I 00 00 0I 04 00 0I 05 00

01 66 08

00 00 04

Nor

Nor any White, dearer l. s. d. than 00 00 06 But the Merchants could not bear this Assis, and fold the Red for 6 d. and the White for 8 d. the Gallon. And the Land (as the Hiftorian observes) was filled with Drink and Drunkards. Annales Burtonenses. An. 1199. Mr. Stow, mentions no Meafure, but a Gallon, for Sextarius. And Sir H. Spelman fays, that at Paris, a Modius Vini holds 36 Sextarios, and that a Sextar is 8 Pints. At this rate Tonellus Vini, will hold, but about 60 Gallons, which is the nearest to our Hoghead. Mr. Stow calls the Poictou Wine, Wine of Rochel: And for the French Wine he fays the Affife was Il. 6 s. 4 d. by the Tun. And fays, p. 165. that they who fold by the Tun, Hog-*(head, or otherwife, contrary)* to this Affile, were to be punished. But, if we are to understand in this place, a

Tun

Tun of English Measure (which is 252 Gallons) by the word Tonellus, then cannot a Gallon of Poictou Wine, come to 4 d. no, nor to I d. fince in XX s. there are but 240 d. I suspect that Sextarius is more than a Gallon: for I do not think. that fo long ago as 1199, Red Wine at I d. ob. and White at 2 d. the Quart, would have filled the Land either with Drink or Drunkards; especially when Anjou, and Poictou were in the English Hands; it must be cheaper much, to make that Observation good. And tho' the Rochel Hogshead, be but 46 Gallons, yet it will not do.

74

In 1202. So great a Scarcety (occasioned by continual Rains) that a Quarter of Wheat, was fold for more than (Annales, Waverl.)

In 1205. There was fo great a Frost, lasting from January 14. to March 19.

l. s. d. 00 12 00

that

that Wheat was at (M. Pal. s. ris.) the Quarter, -----

Mr. Stow fays the Ground was fo hard, that it could not be tilled, and a Quarter of Wheat was fold the Summer following, for a Marc; which in H. II. Days, had usually been at I s. Beans and Peale, by the Quarter, 6 s. 8 d. And Oats, that were wont to be at 4 d. the Quarter, were now at 3 s. 4 d. Fabian puts Wheat, now, at 15 5.

In or about 1217, when the King came to Redbourn, the Camerarius of St. Albans loft three good Horfes, two Affes, and a good new Cart : all which were worth, at least, 50 s.

When Fulco de Brent came to Langley, the Camerarius loft three Houfes, that were burnt, and 35 Hogs, which all came to at least X l. and a Plow that coft X s. (which is a miltake for X d.) And when the King of France's

00 12 00

d.

Ma-

Marechal came, he loft many Oxen, Cows, Sheep, and other Things, and 24 Horfes, valued, at leaft, at 40 Marks, *i. e.* 26 *l.* 13 *s.* 4 *d.* Matth. Paris, page 1059. The Camerarius was the Receiver of the Rents, and who provided Clothes for the Monks.

76

In 1223. Wheat was very dear, and fold per Quarter, at (Stow, in 7. H. III.)

About 1232. The Abbot of St. Albans, going a Journey, and attended with fix Esquires on Horseback, agrees, that if the Horses die on the Way, he will give for each Horse X s. and the Horses are to be strong and handsom; decentes, & fortes ad portandum. M. Paris, p. 1051.

Oats,

4 16 00

their

their own Children. But, I hope, we need not believe him; 'tis only an Expression of the greatest Want imaginable.

In 1286. Wheat was at, the Quarter, -----

But fuch a Storm of Rain, Thunder, and Lightning, fell on St. Margaret's Night, that Wheat came by degrees to, the Quarter, -----

And this Dearnels continued off and on for about 40 Years, fo that fometimes it was fold at London for 4 1. the Quarter. H. Knighton, p. 2468.

In 1287. Wheat was fo cheap, that it was fold at, the Quarter, -----

In 1288. So great the plenty of Corn, and scarcety of Money, that Wheat was told, by the Quarter, at 00 Of 06

So Angl. Sacr. Annales Wigorn. The Waverly Annals fay at 2 s. Mr. Stow fays, that Wheat was fold (tho' the hotteft Summer that

1. s. d. 00 02 08 79

00 16 00

00 03 04

Was

was remembred) at London for 3 s. 4 d. in other Parts of England, at 1 s. 8. d. and IS. 4.d. and IS. nay, in the North, and West Parts, at 8 d. the Quarter. Barly at 6 d. and Oats at 4 d. and Peafe and Beans very cheap. And yet Fabian fets it down this Year at 9 s. 4 d. which is very dear. But it is easie to be mistaken in setting down one Year for another. And therefore when H. Knighton fays, that great Dearnefs continued off and on, for 40 Years, we must understand him candidly; for now and then, it was, in that Space of Time, exceedingly cheap.

80

in 1289. Walfingham fays Wheat was fo cheap, that in fome Places it was fold, the Quarter at 1 s. 8 d. in others at 1 s. 4 d. and in others at 1 s. which does certainly belong to the Year foregoing. Fabian makes this a dear Year, and fays

and an half of Ale, at -	00	04	10
I have observ'd before,		-4	10
that Lagena (a Flaggon)			
(" ruebon)	ł	1	holds

holds

holds 4 Quarts. Now an 132 Flaggons must, at that Rate make 528 Quarts, for which there was paid but 58 Pence : which will bring it to 9 Quarts a Penny, and 6 will remain besides. Now this cannot be allowed; there is therefore a Mistake either in fetting down the Number of the Flaggons, or of the Money paid for them. And fuch Mistakes are very eafie. A Flaggon of Ale, or a Gallon, was (at or near this time) valued at 1 d. or i d. 1. or i d. 1. And if you compute at this last rate, and reckon XV s. for IV, it will come pretty near the Matter.

For XXXII Flaggons of Red Wine, at 8 d. the Flaggon,

For III Flaggons and III Quarts of Sweet Wine, at 15.4 d. the Flaggon, —

This is a manifest Proof, that Lagena holds 4 Quarts; for if it had held 3, there H 3

l. s. d. 01 01 04

Sir H. Spelman, Gloffary V. Graile,						
In 1434. The Autumn was						
fo wet, that for almost two Years following, in many						
Places of the Kingdom, Wheat was fold, the Quar-	•					
ter, at	01 06 03					
And yet at the end of the Year following it came						
H 4	again					

again to (*Hift. Croyland Con- l. s. d.* tinuatio,) 5 s. 4 d. therefore co 05 04 feems to have been the vlual, common Price of a Quarter, about that time.

In 1439 Stow lays there was fuch fearcety.that Wheat was fold at 1 *l*. the Quarter. *Fabian*, at

In 1440. The Scarcety continued, Wheat was, the Quarter, at

Malt, the Quarter, at Oats, the Quarter,

Wine, by the Gallon,

Bay-Salt, by the Bushel,

If 1 am not misinformed, the Statutes of a College, that was founded much about the fame Time with yours, fay, that the weekly Allowance, for every Fellow, Chaplain, and Scholar, fhall be, 1 s. 4 d. and in Times of Scarcety, 1 s. 5 d. and 1 s. 6 d. But if Corn should be (and continue for 20 Days) above 2 s. the Bufhel, then their Allowance fhall be 1 s. 8 d. the Week, 01 06 08

and

and no farther. Wheat therefore at XVI s. the Quarter, must be accounted exceedingly dear. And yet in An. 1440, it was, at the lowest reckoning of Mr. Stow, at 20 s. the Quarter. But, indeed, from that Year, to 1460, I have never found Wheat at above 8 s." the Quarter; and therefore 2 s. the Bushel might well be accounted a very high Price. And here, if it would avail me any thing, I might justly bemoan our want of Hiftory for these last 250 Years, and upwards, (I mean of Latin Writers) there having been very few, that have transmitted any thing (as of their own knowledge) of the Reigns of H.IV, V, VI. Ed.IV, V. Rich. III. except what Sir Thomas More has left us of the two last. But, as to the Purpole in hand, I have had the good Fortune to meet with the Computus's of 9

Or

106

Chronicon Preciolum.

or 10 Years, that will exactly fit you, in this Inquiry, and they are of very great Credit, and shall go under the Name of E.C. but I will first give you an Account of the Price of Things, which I received from a private, but a very creditable hand, of the Year 1444. For an 100 Quarters of Wheat, 21 l. 13 s. 4 d. each l. s. d. Quarter at 00 04 04 For 2 Bushels of Wheat, (I suppose for Seed) 00 10 00 For 2 Bushels of Peafe (for Seed also) 00 IO 00 For 5 Quarters of Peafe, 15 s. each Quarter at 00 03 00 For 50 Quarter of Malt. 10 l. each Quarter at 00 04 00 For 6 Calves, 12 s. each Calf at 00 02 00 For 8 Porkers, 11. 4s. each at, 00 03 besides (i.e. without) the Head. Chronicon Preciosum.

ren. And fo it will be for the 40 Years and more that follow ; our Chroniclers wanted the Care and Observation of their Predecessors: and fetting up for Politicians, quite neglected (as they thought them) leffer Matters. And, by a firange Fortune, I have read the Computus's, or Accompts, of a Publick Body, where there was always good Houfekeeping, and have not yet been able, for the Space of 40, Years, to find what Price a Quarter of Wheat bore, tho' they spent a great many every Month. Your College-Books may fupply these Wants, if you will now and then relax from Studies of more Attention, to inspect these lighter Matters, which will not make you a less useful Member of your Society.

Chronicon Preciolum.

it so for 20, 30, or 40 Years together, you may reafonably conclude, that was not the true Market-Price, becaufe it is not in the nature of the Thing possible, that Corn should be fo long at the fame fland. But yet if you take Things for 20 Years together, 'tis likely that fuch a . Price might be equal enough, betwixt the Landlord and the Tenant, and therefore well agreed upon. When, therefore, I have given you an Observation or two, of Mr. Stow's, relating to the Publick, I will fhut up this long Chapter, with an Account of the Price of Corn for these last 60 Years, such as was indeed, the real Price, and not of Compofition or Agreement; of which you are to make the best Use you! can, in order to the Satisfaction you require.

Ín

Theonicon Pecciolum.

In this Computation, you are to know, that in every Year there are two Prices of Corn, the one of Lady-Day, the other of Michaelmass; both which I put together, and take the half, for the common Price of that whole Year. Of the first 20 Years of these last 60, the common Price of Wheat, was 2 l. 17 s. 5 d. $\frac{1}{4}$. the Quarter.

Malt was 1 l. 12 s. $\circ d. \frac{3}{4}$. the Quarter.

The common Price of the fecond Score of Years was,

Wheat at 2l. 6 s. 3d. $\frac{3}{4}$. the Quarter.

Malt at $1 l. 5 s. 3 d_{\frac{3}{4}}$. the Quarter.

The common Price for these last 20 Years past was,

Wheat at 2 l. 5 s. 9 d. $\frac{3}{4}$. the Quarter.

Malt at $1 l, 5 s, 5 d, \frac{1}{4}$, the Quarter.

K

From

From whence it appears, that, one Year with another, for these last fixty, Wheat has been, the Quarter, at

130

And Malt (abating the Fractions) at

Which is, 6 s. 2 d. ob. q the Bushel of Wheat, and 3 s. 5 d. q. the Bushel of Malt, and somewhat above.

Tho' I ought to acquaint the Reader, that the Market I have computed by, is fomewhat higher than those at a very great distance from London; in which, if we allow Wheat to have been at 40 s. and Malt at 24 s. the Quarter, we shall come nearer to the Truth, in general.

CHAP.

CHAP. V.

Of Stipends, Salaries, Wages, Jointures, Portions, Day-labour, &c.

N the Council held at Oxford, 1222. It was decreed, That where the Churches had no greater Revenues than V Marks per An. they fhould be conferred on none, but fuch as fhould conftantly refide in Perfon, on the Place. Spelman, Conc. Angl. Tom. 2.

A fingle Priest might therefore subsist on V Marks, but he could not afford to keep a Curate.

Accordingly Ste. Langton, A. B. Cant, in the fame Year decrees, That the Perpetual Vicar fhall have V Marks affign'd him, *i. e.* as much as may be farmed out for V Marks. Except in Wales, where by reafon of the finalnels of the Livings (and plenty, I fuppofe, of Provisions) the Vicars are contented with lefs Stipends. Ibid.

In 1287. Peter Quivil, B. of Exon, in Synodo Exoniensi, decrees, That in every Parochial Church, the Perpetual Vicarage, should be endowed with, at least, V Marks K 2 per

per An. that he may, in fome Measure, keep Hospitality; and in case he grow old, fickly, or impotent, may be thereby fustained. This must be done, if the Living be really worth XL Marks per An. But if it be of better value, the Vicar's Portion must be increased.

And as for a Curate (whom he here calls (a) Parochialis Sacerdos) he decrees the Redor (hall pay him 40 s. per An. for his Stipend: and fays, if the Rectors think themfelves agrieved by this, they may do their Work themfelves, and tave that Money. He also mentions Sacerdotes Auxiliarii, (b) and decrees, that they fhall have 50 s. per An. at least; and if they have agreed for lefs (c), such Agreement to be void. Concil. Ang.

(a) I fhould have thought, that Sacerdos (join'd efpecially with Parochialis) fhould have fignified a Parifb-Prieft, Re-Etor, or Vicar, as diftinguilh'd from his Capellanus, or Curate; but he feems to be here, a mere Stipendiary Curate, and removable, whenever the Rector will do his Bufinefs himfelf. (b) Why an Auxiliary, or Afhfant Prieft, fhould have 50 s. per An. when the Curate had but 40, I cannot fee: But there is very good Reafon, why fuch under-hand Bargains (c) should

fhould be made void, which were fo much to the Prejudice of poor Curates. And therefore (before this Constitution) in 1253. among the Articles of Inquiry, for all the Dioceles of England, one was, Whether any Rectors had made a Bargain with their Curates, that, befides the Stipends they received from the Rectors, they might receive from others, Annualia, & Tricennalia; because this permitting of the Curate, to be a Mass Priest, and to perform Annualia, & Tricennalia, was to fave the Rector, from giving fo fair and reasonable a Stipend, as he ought. Annal. Burton, in 1253. Note, That Annualia, were fuch Oblations, as were made by the Relations of the Deceased, upon the Day the Party died, every Tear : which Day, our Fathers called the Tears-Day, or Tears-Mind, and, upon it, Mass was celebrated with great folemnity, by one of the most confiderable Clergy-men, that could be procured, according to the Quality of the Deceased. Tricennalia were called Trentals, from Trigintalia, and in English, a Months-Mind, because the Service lasted a Month, or 30 Days, in which they faid to many Masses. As M. Du Freine observes on the word Tricenarium, Officium XXX Miffarum, quod totidem diebus K 3 pera-

134

peragitur, pro Defunctis, vel Obventiones quæ obveniunt Sacerdotibus, ratione ejusdem Officii.

In 1289. Gilb. Ciceftr. decrees, the Curates, in poor Churches, must have V Marks, for their Stipend; in richer Churches, they must have more.

In 1306. W. Grenefeld, A. B. Ebor. decrees the fame thing. Concil. Angl.

In 1308. Rob. de Winckellea, A. B. Cant. decrees, that no Curate shall serve under V Marks per An. Idem, ibid.

In 1348. H. Knighton fays, that the great Pefilence had fwept away fo many Priefts, among other People, that a Chaplain could hardly be gotten to ferve a Church, under X Marks, or X Pounds per An. whereas before, they might be had at V, or IV Marks, nay at 2, together with their Diet: and Men would hardly accept of a Vicarage of 20 Marks or 20 l. per An. pag. 2600. This, I fuppofe was, becaufe Vicars were thought to be obliged to ftricter Refidence, which, in Peftilential Seafons, was, doubtlefs, hazardous.

In 1360. J. Thoresby, A. B. Tork, decrees the fame thing with his Predeceffor Grenefeld in 1306. Concil. Ang. V. 2.

In 1362. Simon Ifelip, A. B. Cant. decrees, that Chaplains Annalia Celebrantes, and having no Cure of Souls, thall be content with V Marks per An. and they who have Cure of Souls, with VI Marks, unlefs the Diocetan, for good Caufe, thall order more. But Mr. Stow observes upon it, that it occasion'd many of them to turn Robbers. p. 265.

The fame A. B. the Month after, complains that the Priefts grew wanton, and were not content with reasonable Stipends, for ferving Parifh Cures; but went about, rather chusing to fay Mass, for the Living and the Dead, and get what they could that way, than fix in any certain Place : and therefore orders and appoints the fame Salaries above-named : and if any One took any more, under any Pretence whatever, they should be punished. Concil. Angl. This had been highly unreasonable, unless V or VI Marks, had been, at that Time, thought a sufficient Maintenance for a fingle Perfon. And fo accordingly about that Time, we find it was the ufual Salary.

In 1371. In Stipendiis unius Capellani, 02 l. 135. 04 d. Burton Ant. Leicest. 87.

K 4

136

In 1378. Simon Sudbury, A. B. Cant. repeats the Decrees of his Predeceffor Simon Ifelip, and makes the fame Complaints. And decrees, that every fuch unfix'd Mafs-Prieft, fhould content himfelf with VII Marks per An. either all in Money; or with Diet and III Marks in Money. And he that takes a Cure, to content himfelf with VIII Marks, or with IV Marks and his Diet. And all this, under pain of Excommunication. Concil. Angl.

This Matter feem'd to be of fuch importance, that the Parliament, in 39 E. III. made Rules about it, in these Terms. c. 8. ' If any Secular Man of the Realm, pay " any more than V Marks, to any Prieft vearly, in Money, or in other Things; to the valure; or if he pay to fuch ' Priest retained to abide at his Table, ' above two Marks for his Gown, and ' his other Necessaries, (his Table ac-' counted to 40 Shillings) and thereof ' be attainted, He shall pay to the King, fully as much as he paid to the faid Priest. And this was renewed in 1414, 2 FI. V. St. 2. c. z. in the following manner.

'No yearly Chaplain, within the Realm, fhall take, from henceforth, more for his whole Wages, by Year (that is to fay,

⁶ fay, for his Board, Apparel, and other ⁶ Neceffaries) but VII Marks. Nor the ⁶ Parifk-Priefts which be, or fhall be re-⁶ tain'd to ferve Cures, fhall take, from ⁶ henceforth, for their whole Wages, by ⁶ Year (that is to fay, for the Things ⁶ aforefaid) but VIII Marks: unlefs it ⁶ be by Licenfe of the Ordinary. So that ⁶ the whole Summ pafs not IX Marks. And in 27 H. VI. a Pardon was paffed for fuch Priefts as had offended againft thefe Acts.

In 1421. H. Chichely, A. B. Cant. at the very importunate Inflance of his Clergy, in Convocation, does, with the Confent and Advice of his Suffragans, confirm and ratifie the Decree of his Predecessfor, S. Sudbury in 1378, repeating the very Words of it. Idem, ibid.

And in 1439, (which is very near to the Time you are inquiring after) the fame A. B. Chichely, in Convocation alfo, decrees, That Vicarages shall be augmented (by the Rectors, or Appropriators) to XII Marks per An. if the whole Benefice be worth fo much, to support the Burthens incident to Vicarages. Id. ibid.

Vicarages were at first, free from all Incumbrances and Burthens; but by the Artifice of the Monks, and Religious, the Favour

138

Favour they found at *Rome*, the Compliance of the *Bifbops*, and by other Means, they came, by degrees, to bear almoft equal Charges, with the *Rectors*, tho' much lefs able to do it. And therefore, tho' it was very well, and wifely done by this Arch-Bifhop to augment Vicarages to XII *Marks*, yet confidering the Charges and Burthens incident to Vicarages, they were not much advantaged by it; for a *Vicarage* of XII *Marks*, with its Burthens, may not be fo good as a *Curacy* with VII or VIII *Marks*, without Incumbrance.

And therefore, even in 1439, (which is very near to the Time of the Foundation of your College) a fingle Man was thought to be provided for, by a Stipend of VIII Marks, which is but VIs. VIII d. above the Summ you are inquiring about. You may therefore very reafonably conclude, that, about that Time, a fingle Man might live cleanly and decently, with good Management, with V l. per An. because it is not to be prefumed, that an Arch Bifhop, at the Head of his Clergy, and at their Request too, should decree fuch an Allowance for officiating Clergymen, as would not keep them (if vertuous Men and fober) decently and cleanly.

Let

Let us ice alfo, a little, to the Allowance of *Chantry-Priests*, and fuch like.

In 1237. H. III. gives VIII l. out of the Exchequer for 3 Chaplains, to do Duty daily in the Temple-Church, London, which is IV Marks per An. each. In Monasticon Angl. V. 2. p. 521.

In 12.42. Alexander B. Cov. and Lichf. erected an Office of Chanter in that Church, and allowed for his Salary VI *l.* X s. Ang. Sac. P. I. p. 446.

In 1313. E. II. ordained and commanded, that his Chappel of St. Edward, in the Cafile of Windsor, should be kept and ferved in the manner following.

First, To the honour of God, of our Lady, and Saint Edward, for him and his Ancestors, it is ordain'd there be four Chaplains, who shall be Men of good Condition, and Discreet; of which one shall be Head-Chaplain of the Chappel, and the other three shall be his Seconds, or Afsistants.

2. Alfo two Clerks, of good Condition, and that chant well, and in all Points attendant on the Head-Chaplain, and on the others, as oft as there shall be occafion for the Service of the Chappel.

3. Each of the aforefaid Chaplains, fhall fing Mass every Day, without some 1. good

good Caufe to the contrary; fo that every Morning there be two Maffes, by Note, the one of our Lady, the other of the Day: the other two of Requiem, for the Souls of the Anceftors of our Lord the King.

4. The Head-Chaplain, to defray his whole Expence, is to receive X Marks per An. Each of the other Three an C s. the two Clerks, each of them L s.

5. And the King's Chancellor, whoever he be, becaufe he is the Head of the King's Chappel, fhall make, once every Year, a Journey thither, if he can be difpenfed with by the King, to fee that the faid Chappel be ferved with Ornaments, Library, and Chantry, in the aboveappointed manner; and make out his Breve de Liberatæ, for the faid Ministers, to be paid their Wages, duly, twice a Year.

6. And if any of the above-faid fix Chaplains, or Clerks shall die, or be removed, the said Chancellor shall put a sufficient Person in his Place. The Title of this Record is, *De Providentiis pro Capella Windeforæ*: and it is in Mr. Rymer's 3d Vol. of Fædera, &c.

It appears (5.) that the Chancellor, was the Head of the King's Chappel; and in the Life of Thomas Becket (Chancellor to

to H. II.) written by one who lived at the fame Time with him, that it was part of the Chancellor's Office, ut Capella Regia, illius fit dispositione & Cura. This feems to be the Reason of the Lord Chancellor's being (altho' no Clergyman) the Visitor of the College of Dean and Canons of St. George in Windsor Cafile, founded by Ed. III. his Son, which is the King's Free Chappel, who was also born at that Place, of which there is this Memorandum, in the fame Vol. 3. 1312. which, it will not be much out of my Way, to transcribe in this Place.

⁶ Memorand. Ifabella the Queen was ⁶ brought to Bed, in Windfor Caftle, on ⁶ Monday the next after the Feaft of ⁶ S. Martin, in Winter, in the Year of ⁶ Grace 1312. the 6 E. 2. of her first-⁶ born Son; and in S. Edward's Chappel ⁶ in the fame Castle, he was christned ⁶ the Thursday following, by the Cardi-⁶ nal S. Prisca. His God-fathers were ⁶ A. Pictaviensis Chamberlain to the Pope; ⁶ J. Bp. of Bath and Wells; W. Bp. of ⁶ Worcester; Lewis Count d' Eureux; John ⁶ of Brittany Earl of Richmond; Aymary ⁶ de Valence E. of Pembrook, and Hugh ⁶ le Despenser.

In 1315. Two Chanters were appointed in the Church of *Lichfield*, and had, each for his Salary, V *l*. XV s. Angl. Sac. P. I.

In 1332. Elizabeth de Burgh makes an Agreement with the Prior and Convent of Anglesey in Cambridgesch. for XX 1. per An. which fhe gives that two Chaplains shall be maintain'd, with each a convenient Manse, or Dwelling-house, and Diet, and XX s. for Robes and other Necessaries : or elfe to allow them XII Marks, to find themfelves in all Things; unlefs the Prior and Convent can agree with them for lefs. And in 1335, the difcharges the Prior and Convent of one of those Chaplains, upon their paying to Rob. de Spalding, an Annual Penfion of an Cs. and gives them moreover a Rent-Charge of XI s. XI d. Monaft. Vol. 2. p. 259.

These Chaplains therefore were thought able to live, each upon VI Marks, i.e. 4 Pounds per An.

Between 1345, and 1381, Thom. of Hatfield, B. of Durham, tounded a College for 8 Monks, and 7 young Men, to fludy the Liberal Sciences; and allowed to each Monk IV *l*. and to each Student V Marks. Angl. Sacra.

In

I42

In 1350. Two Priests, to officiate alternately, during the whole Year, every Day, at the Church of *Sherishoton* in the Diocese of *Tork*; to pray for the Souls of *R Nevil* Ld. *Raby*, &c. for VII *Marks* between them. In Mr. *Maddox's Formulæ*, p. 450.

In 1373. The Master of the Hospital of Fosse gate in Torksh. is to be a Clergyman, of good Fame, and Discretion; and is to have for his whole Maintenance, the Summ of X Marks per An. And if the Revenues increase upon his Management, he is to get another Chaplain to assist him, who, for his Pains, is to have VII Marks per An. And they must, both of them, constantly reside, and constantly officiate, on the Place. Monast. V. 3. p. 99.

In 1400. John Plumtree of Nottingham, erected two Chauntries, with two Chaplains to attend daily : to each of whom he allowed an Cs. or V l. per An. Monast. V. 2. p. 448.

In 1408. Fabian fets it down, that the Stipend of a Mass-Priest, was VII Marks.

And, not to multiply Inftances of this kind, of which you cannot fail of meeting many, in all our Hiftories; There is a College in the University of Cambridge, founded about the Year 1450, in which the

144

the statutable Allowance to each Fellow, is V l. per an. to find him in Diet, Clothes, and all other Necessaries.

You must now be content, with Mifcellanies, the order of Time however being observed.

Betwixt 871, and 900, King Alfred left, by Will, to each of his Daughters, an Hundred Pounds in Money. Mr. Cambden (in his Remains) fays 400 l. But it appears by the Will, printed at the end of Alfred's Life at Oxford, that the 400 l. was divided betwixt his 3 Daughters, and one Alfwith : But the Reader must not think that this was the whole of their Portion, for he had fettled Lands on each of them before, but this was all he left them in Money.

In 1087. When W. Rufus came to inquire into the Treasure his Father had laid up, at Winchesster, he found it by weight 60000 l. of Silver, besides Gold and Jewels. He gave by his Father's Order, and for the good of his Soul, to each Great Church (*i.e.* Abbey, Convent, or Cathedral) X Marks. To each less one V Marks, to every Parish Church Vs. and to the Poor of every County an C l. Thus Ingulfus, who lived at the fame Time.

In 1101. The Composition betwixt H, I. and Robert his elder Brother, was, that Robert should have 3000 l. per An. in Weight. Pet. Blæsens. Contin. The words, in Weight, are put in, to signifie that the Money should not be clipped, for a Pound by Tale was at this Time, and long after, most certainly a Pound in Weight.

In 1135. When King Stephen was crowned, he feifed the Treasure which *H*. I. had left, which came to 10000 *l*. befides Gold and Silver Veffels, with other Jewels ineftimable. Tho. Rudborn, *Hift. Winton.* p. 284.

In 1193. The Ranfome of R. I. was an 100000 Marks in Silver. Rad. de Diceto, fays they were Pounds. But Mr. Rymer's Volumes are of greater Authority, than any private Writer's Works, being made up of Records.

In 1201. K. John agreed to pay Berengaria, the Dowager Queen of R. I. a 1000 Marks per An. for her Dowry, which he increased, in 1215, to a 1000 Pounds per An. M. Rymer, in Anno.

In 1207. Amph. Till. being taken Prifoner by K. John, was put to Ranfom, at 10000 Marks, in part of which he is to pay X Horfes, at the rate of 30 Marks a-piece, or in lieu of them 300 Marks. L Who

Who this Man was, I cannot find, but his Horfes were certainly as high-prized as they could well be.

In 1221. Joan, eldest Daughter to K. John, married to Alexander K. of Scotland, had a Dowry of 1000 l. per An. Rymcr.

In 1226. *H*. III. confirms the Dowry of *Ifabella* his Mother, and fays it was the fame that *Elianor* his Grand-Mother had, and makes the fame to *Elianor* his own Wife, the E. of *Provence's* Daughter, in 1235, with whom he was to have 20000 *Marks* for Portion. But the *private In-ftrustions* were, to accept of 15000, or 10000, or 7000, or 5000, or 3000. Nay, the was to' be brought away, tho' they could get nothing at all with her. *Rymer.*

In 1236. Ifabella, Sifter to H. III. was contracted to the Emperor Frederic, with 30000 Marks. Idem.

In 1254. Edward, the Son of H. III. promifes a Dowry of 1000 l. per An. to Elianor the K. of Castile's Daughter, whilst he is Prince; but fays, when she comes to be Queen, he will add 500 Marks per An. more. And upon this Marriage, H. III. settles 15000 Mark's per An. on the Prince. Idem.

In 1278. E. I. gives, with his Daughter Joan, contracted to Hartman, Son to the K. of the Romans, 10000 Marks Sterling; which are to be return'd in cafe that Hartman die before her, together with what Prefents the faid Husband shall ever make to her. Idem.

In 1294. E. I. took into his hands, all the Effates of the Priories-alien, allowing to every Monk, 1 s. 6 d. per Week, which comes to, 3 l. 18 s. by the Year. And therefore, I fuppofe, a Monk might live tolerably well on that Allowance. For the King was not angry with the Monks; but these Priories were Cells to Monasteries in France, (with which Nation the K. was now at open War) and whatever Surplusage there was, after the Charges of the Cells at Home were defraid, it was fent to the Monasteries, or principal Houses abroad; which was indeed feeding the King's Enemics.

In 1299. Ed. I. contracts with Margaret Daughter to the K. of France : 18000 l. Turonenf. (four of which make one Pound Sterling) being agreed upon for her Dowry. This in English Money came to 4500 l. per An. But in 1315, he increased it to 5000 l. per An. Rymer.

L 2.

In

148

In 1301. The Widow of Edmund E. of Cornwal (Son to the K. of the Romans, and Nephew to H. III.) was, at the requeft of several Lords in Parliament, endowed with a Jointure of 500 l. per An. by E. I. Tho. Walfingham.

In 1302. E. I. promises, to Isabella Daughter to the K. of France, contracted to his Son Edward, 4500 l. per An. Rymer.

In 1306. E. I. leaves to his Son Thomas 10000 Marks, to his Son Edmond 7000 Marks per An. and to Elianor his Daughter for her Portion 10000 Marks, and 5000 to buy her Apparel. Idem.

In 1307. E. II. confirms the Grant his Father E. I. had made to his Sifter Mary a Nun at Ambrosebury, of 200 l. per An. 40 Oak-Trees for firing in her Chamber, and 20 Dolia (or Hogtheads) of Wine, as long as the continued in the Nunnery, and lived in England. And the Reader will not, I believe, be difpleated, to fee the Care that was taken in those Days, for the Suftentation of the Daughter and the Sifter of a King of England, in 1313. fym.

The

The King, to the Sheriff of Wiltes, greeting.

Or as much as We are indebted to our dearest Sister Mary, a Nun of 6 Ambrosbury, in the Summ of 12 l. 7 s. 3 d. 6 as well for Hay, Oats, Litter, and Shooing, as for her Servants Wages, whilst ' she tarried at Windsor, in the Month of 6 December last past, as also for her Ex-6 pences in travailling from Windsor to 6 Ambrosbury, as in a Bill of our Warde-6 robe, delivered by our Sister into our ' Chancery, appears more at large. ---"We willing to fatisfy our Sifter, in this ' Particular, with all the fpeed we may, Do hereby command you, to pay to ' our faid Sifter, or her lawful Attorny, 6 the faid Summe, out of the Issues of 6 your Bailifry, without delay; and We, ⁶ in your Accounts at our Exchequer, shall make all due Allowance for the 6 ' fame.

Witnesse, the King, at Windsor, Jan. the 1st.

By a Bill of the Warderobe.

In 1309. The Penfions allowed by the K. to the Cardinals, and great Officers of the Pope, who were, as it were, retained by the Court of England, were, to fome, an 100, but to most of them 50 Marks per An.

In 1310. William de Morene of Saunford, Kt. being taken Prisoner by the Scots, had allowed him by E. II. for his Wages, 4 d. the Day; and for his Robe, XX s. the Year. The better fort of Prisoners had 3 d. ordinary ones 2 d. the Day.

In this fame Year, A Man at Arms, was allowed X d. a Baliftarius (a Croffe-bowman) 3 d. an Archer or Bow-man, 2 d. the Day. And the Price the K. paid for a Balifta, was 3 s. 8 d. Mr. Rymer's Collections in Annis.

In 1311. When the Order of Knights-Templars was to be deftroyed, their Perfons imprifoned, and their Eftates confifcated; many of their Servants, Chaplains, and Dependants, were, to be fure, otterly deftitute, and undone: The King, E. II. thought himfelf obliged to make fome Provision for them. Some of the Knights were committed to Monasteries, there to do Penance for their Offences; and to them the King allowed 4 d. a Day, which seems to have been their usual Allowance,

Theonicon Pecciolum.

lowance, because in the Mandate to the B. of Bath and Wells to make this Allowance to 4 Knights, it is there faid, Sicut prius percipere consueverunt. To the Great. Master, William de la More, 2. s. To feveral of their Chaplains, the King allows (as the Knights did formerly) 3 d. a Day, for their Diet, and XX s. for their Stipend, which is, by the Year, Vl. XI s. III d. To other Servants 2 d. and to inferior ones 1 d. and V, or X s. for their Stipend, or Livery. And for this, they were to do the fame Service, they had done to the Knights, whilft the Lands were in their keeping. Rymer's Collection.

In 1314. Elizab. Wife of Rob. Bruce (King of Scotland) being Prifoner in England, is allowed, for her felf and Family, XX s. by the Week. To Rob. Wychard Bp. of Glafgow, and Will. de Lamberton B. of S. Andrewes, Prifoners, is allowed, each of them 6 d. a Day, to a Valet 3 d. to a Chaplain 1 d. ob. and to their ordinary Servants 1 d. ob. Idem.

In 1316. Ed. II. gives to Theophania, a French Lady, a yearly Estate of 500 !. for ever, because she had been Nurse to Isabella his Queen. Idem.

L 4

In 1330. Joan of Oxford, Nurfe to the Black Prince, had a Pension of X l. per An. and Maud Plumpton a Rocker had X Marks. Dr. Kennet Paroch. Antig.

In 1326. Edward II. being deposed, had an 100 Marks, by the Month allowed to maintain him; which is at the rate of 800 l. per An. Walfingham.

In 1495. When the Lady Anne, Daughter to Edw. IV. and Sifter to Q. Elizab. Wife of H. VII. was married to Tho. L. Haward, eldeft Son to the E. of Surry, it was agreed, that fhe fhould be allowed, for her Suftentation, and convenient Diet, of Meat and Drink, XX s. by the Week. And for two Gentlewomen, a Woman Child (*i. e.* a Servant) a Gentleman, a Yoman, and three Grooms, (in all 8 People) 51 l. 11 s. 8 d. by the Year. And for Suftentation of 7 Horfes, 16 l. 9 s. 4 d. *i. e.* for each Horfe, 2 l. 7 s. 0 d. ¹/₂. M. Maddox Formul. p. 109.

In 1091. All the Men of Croyland, that will have any Turfe out of the Abbot's-Mar/h, must either work a Days-work, or give Three Half-Pence for one to cut Turves for Croyland-Court. Ingulfus.

The Serjeant of the Infirmary, fhall, for his looking after the Sick, receive for his Reward (if the Party die) a Coat, or

or 4 s. and every one that watched with the Deceased, shall have 2 d. for every Night. Idem ibid.

A Coat is reafonably valued at 4 s. but 2 d. a Night, for watching, was an extraordinary Recompence. This Serjeant of the Infirmary was to have his Livery of Meat, Drink, and Bread, and 4 s. per An. for Stipend. Idem.

In 1225. Magna Charta, C. 22. No Sheriff or Baily of ours, shall take the Horses, and Carts, of any Man, for Carriage, except he pay the old Price limited, *i. e.* for Carriage with 2 Horses 10 d. by the Day: and for 3 Horses 14 d. In Antig. Constitut. Admiralitatis (but

In Antiq. Constitut. Admiralitatis (but of what Age it appears not) it is thus appointed. Si l' Admiral soit Bacheler, il prendra la jour, pour lui meme, sur la Mer, IV s. Si soit Baron, VI s. VIII d. S' s' il soit Count, XIII s. IV. d. Bacheler, is here, a Knight. And I guels, as well by the Language, as the Wages, that this Constitution is not very ancient. S. H. Spelman in V. Admiral.

In 1329. Alfo they shall barrow for 3 Days, or shall pay 3 Pence, *i. e.* a Penny for a Days-work. It must not however, I think, be always concluded, from such Passages as these, that Men worked for a Penny, by the Day: because it seems to have

154

have been the Custom, in some Places, for some sort of Holders, to be obliged to perform such and such Works, for the Chief Lord, at such and such a Price. So in the word Session S. H. Spelman's Glossary. Extenta Manerii de Garinges. He is to work a Days-work, every Week, from Michaelmass, to the first of August, and for it, he is to receive for each Day, 3 Farthings. And from the first of August, to Michaelmass, he is to receive a Penny-Half-Penny; excepting the Winter-Season. Excepta Sesone hiemali. See also the word Lanceta, where you will find much fuch another Custom.

In 1293. The Parcarii of the Earl of Cornwall, were to have 2 Meals, or 2 d. by the Day, but the Earl would needs have 3 d. which the Inhabitants complain of. S. H. Spelman, in V Putura. I will, in the next Place, give you

I will, in the next Place, give you (out of S. W. Dugdale's Origines Juridicales) fome Account of the Judges Fees or flated Salaries, but it is very imperfect, and only better than none at all.

In 1440. Upon a general Complaint of all the Benches, and of the Attorny General, of the ill Payment of their Fees, there was an Inquiry made, what they had ufually received, for the laft X Years past, and what the Crown was indebted to them; by which, and by the Answer that was made to it, it appears, that the ftanding Fee of each Chief Justice was 40 l. per An. but that by private Let-ters Patent, the Ch. Just. of the Com. Pleas was allowed 180 Marks per An. And the Chief Justice of the K. Bench was allowed 140 Marks per An. besides their Fees. And for their Winter Robes, 5 l. 6 s. II d. 1. And for Summer Robes 31.6s.6d. The Fee of the Justices of both Benches was 40 Marks per An. their other Allowance was 110 Marks. The Fee of a Justice of Affile was 20 l. the Fee of the Attorny General was X l. per An. and what their other Allowance was, does not appear. The Allowance to the King's Serjeants, and the Attorny, for Robes. was 1 l. 6s. 11 d.

In 1545, the Chief Just. of the K. Bench had an Addition of 301. to his Fee: and each Just. of the fame Bench, and of the C. Pl. had an Addition of 201. And indeed, at the very best, their Rewards feem

158

feem to have been far from equal to the faithful Difcharge of their most painful and most useful Office: and yet it hath fo pleased God, to bless their Labours, that I do not think I misseckon, when I fay, That the Law hath laid the Foundation of Two Thirds of all the Honours, and great Estates in all England.

Let us now fee a little to the Wages of Workmen and Servants, which has ever been accounted of fuch Importance, that the Parliaments themfelves have thought fit to take cognizance of it, and to regulate it, according to the Rules following; tho', I think, with no great fuccefs.

In 1351. Workmen were to take their Wages in Wheat, at the rate of X d the Bufhel, which is 6 s. 8 d. the Quarter.

The Reader is not to think that these Rules were every where observed; but no Body could *demand*, or *fue* (I suppose) for greater Wages, than were here allowed: and yet the different Cheapness or Dearness of Provisions in several Countries, must be allowed to make amends for different Wages; and therefore these Rules could not be universally reasonable.

M₃ CHAP.

166

CHAP. VI.

The Conclusion.

O apply the Chapter of Corn, and make it useful to your prefent Purpole, you must, in the first place, remember, that, during the whole Reign of Henry VI. excepting the first and last Years of it (which contains 17 Years above the Time of your Enquiry, which is from 1440 to 1460,) there were XXX s. in the Pound; whereas there are now (and have been for above an 100 Years) LXIIs. The Ounce of Silver was then, at IIs. VI d. 'tis now at V s. II d. So that the V l. (which is the Summ you are concern'd about) did then contain 40 Ounces; and V l. now, does not contain above 19 Ounces 1. From whence you may fafely conclude, that V l. in the Reign of H. VI. was of fomewhat better value, than X l. now-a-days is. In the next place, to know fomewhat more diflinctly whereabouts an Equivalent to your ancient V l. will come, you are (as I before hinted) to obferve how much Corn, Meat, Drink, or Cloth, might have been

been purchased 250 Years ago, with V 1. and to fee how much of the modern Money will be requisite to purchase, the fame quantity of Corn, Meat, Drink, or Cloth, now-a-days. To this End, you must neither take a very dear Year, to your Prejudice, nor a very cheap one, in your own Favour, nor indeed any fingle Year, to be your Rule; but you must take the Price of every particular Com-modity, for as many Years as you can (20, if you have them) and put them all together; and then find out the common Price; and afterwards take the fame Course with the Price of Things, for these last 20 Years; and see what Proportion they will bear to one another ; for that Proportion is to be your Rule and Guide.

Thus, if for 20 Years together (from 1440, to 1460,) the common Price of Wheat were VIs. VIII d. the Quarter; and if from 1686, to 1706, the common Price of Wheat were 40s. the Quarter; 'tis plain, that Vl. in H. VI. Time, would have purchafed 15 Quarter of Wheat; for which you must have paid, for these last 20 Years, 30 Pound. So that 30 Pound now, would be no more than equivalent to Vl. in the Reign of M_4

168

Chronicon Preciosum.

H. VI. Thus if Oats, from 1440, to 1460, were generally at 2.5. the Quarter, and from 1686, to 1706, were at 12 s. the Quarter, 'tis manifest that 12 s. now, would be no more than equivalent to 2.s. then, which is but a fixth Part of it. Thus if Beans were then 5 s. and now 30 s. the Quarter, the fame Proportion would be found betwixt 5 l. and 30 l. But you must not expect that every Thing will answer thus exactly. Ale, for Instance, was, 'during the time of your Founder, at Three-half-pence, the Gallon: but it has been, ever fince you were born, at 8 d. at the least: which is but 5 times more, and a little over. So that 5 l. heretofore (betwixt 1440, and 1460,) would purchase no more Ale, than fomewhat above 25 l. would now. Again, Good Cloth, fuch as was to ferve the best Doctor in your University, for his Gown, was (between 1440, and 1460,) at 3 s. 7 d. ob. the Yard; at which Rate V l. would have purchased 27 Yards, or thereabouts. Now, you may purchase that quantity of fine Cloth, at fomewhat lefs, I think, than 25 l. So that 25 l. now, would be an Equivalent to your 5 1. then, 250 Years fince, if you pay about 18 s. the Yard, for your Cloth. I think I have good

good Realon to believe, that Beef, Mutton, Bacon, and other common Provifions of Life, were fix times as cheap in H. VI. Reign, as they have been, for these last 20 Years. And therefore I can fee no Cause, why 28, or 30 l. per An. should now be accounted, a greater Estate, than V l. was heretofore, betwixt 1440, and 1460.

Sir H. Spelman (a very competent Judge and Æstimator of these Matters) complains, That the Laws have not fufficient regard to the different Price of Things, when they condemn People to death, for stealing Things to the value of twelve Pence; for tho' that is according to Law, yet that Law was made when twelve Pence would have purchased, as much as you must now-a-days give 20, 30, nay 40 s. for. And he instances in a Quarter of Wheat, which in the Assile of Bread, 51 H. III. was rated at twelve Pence, but, in his Time, was often fold for 40 s. and upwards. 'Tis certain, the Laws do never condemn any One to death, for flealing to the value of one, no, nor 3 or.4 Shillings : but 'tis certain, that many die for stealing Things of less value than 20 Shillings. And therefore, I think, I have very sufficient Reason, (not to determine, but) 170

Chronicon Preciosum.

but) to conjecture, that 5 l. 260 Years ago, was equivalent to 28, or 30 l. now. And confequently, that he who has an Estate of Inheritance, or a perpetual Penfion, of that value, now-a-days, may as honefly hold a Fellow/hip with it, as he who lived 260 Years ago, might have held it, with 99 s. per An. Nor does my Kindnefs and Concern for you, biafs my Judgment in this Affair; for I have thought the fame Thing, long before your Question was put; and, indeed, ever fince I could confider the difference of Times, and the different Prices of Corn and all other Commodities. And I had rather put your Confcience on this Bottom, whole Reafon is clear, and founded upon Matter of Fact, and Hiftory not to be controll'd; than upon the common Prefumption, that your Founder did certainly intend, his Scholars, should live like other Scholars of the University; and that the Way of living being now much changed (do not offer to fay improved) from what it was fo long ago, you must needs be at liberty to live in the same Manner; for I dare fay, that neither your Founder, nor any other Founder, if he were now alive, would admit of many expensive Articles, which the corrupt Customs of the

the Times, and multitude of Examples, have made young People think neceffary; and which, I am perfuaded, muft, fome time or other be reformed, as Things neither ufeful nor creditable to the Life of a Student. But of this, you will think I have faid at leaft enough.

The Application of the Chapter of Stipends, to your Purpofe is this; That if, about your Founder's time, 7 or 8 Markswas judged a competent Provision for a fingle Clergy-Man, and 8 Marks do not much exceed 5l then V. l. was a tolerable Maintenance for a fingle Student. And if fo, then if 28, or 30 l. be now-adays, but a fufficient Maintenance, for a fingle Student (fober, and virtuous) it can be prefumed to be no more now, than 7 or 8 marks heretofore was, and therefore may be enjoyed with the fame Innocence and Honefty, together with a Fellow/hip, according to the Founder's Will.

I have now difcharged my Engagement, and given fuch Anfwer to your Queftion, as I think is reafonable, and Honeft : and might here take my Leave of you, if I did not think it would be acceptable enough, both to you, and other Readers, to acquaint you, that fince I was

172

Chronicon Preciosum.

was employed in writing an Answer to your Question, I had another put to me, concerning the Oath which the Sheriff of a County puts to fuch as are *Electors* of Parliament-Men, if he thinks fit; viz. Whether they have Lands or Tenements to the yearly value of 40 s. ultra Reprifas? i.e. Whether they have 40 s. per An. clear. All certain and neceffary Charges being abated and deducted; for tho' a Man may receive 8 l. a Year for his Estate, yet if his Quit-Rent, or any other certain Payment, be 13 s. 4 d. that Man has not an Estate of 8 l. ultra' Reprisas. because there is 13 s. 4 d. to be reprized. or taken back again, which is, I think, the meaning of the word. Now this Act of Parliament was made, 8 H. VI. when 40 s. per An. clear of all Encumbrance, was at least equal to 8 l. per An. now-adays, (I put it fo low, to avoid all Cavil and Difpute.) When a Freeholder therefore, does now take his Oath, that he has an Estate of 40 s. per An. 'tis manifest he does not mean 40 s. as it was valued when that Act of Parliament was made (1430) but as 40 s. go now in 1706. Is it not therefore manifest that he does not fwear to the Purpose and Intention of the Law-givers, and only fwears true to the

the Denomination of 40 s. per Annum? To this I answered, That doubtless, the Purpose and Intention of the Legislators, in 1430, was defeated by fuch an Oath, when he who fwears has really but 40 s. per An. as Money and Things go now. But yet that fuch an Oath was honeftly taken, and without any perjurious Fraud, or Refervation, because taken according to the literal Sense of the Words of it, and because taken in the Sense of those who administer it, and (as is most reasonably prefumed, tho' not declared) in the Senfe of the Legislative Power, which accepts, and justifies fuch Proceedings, and which has equal Power and Authority, to put what fignification it pleafes on Words, with the Parliament that made that Act, in 1430. These Things, when put together, may look, at first fight, somewhat odly; that one Man may fwear he is not worth V l. per An. according to the Statute that requires fuch Oath, when he is really worth more than X, or XX l. per An. and another may fwear he is worth 40 s. per An. when he is really not worth 10 s. per An. according to the Statute that first imposed that Oath. You fee then how necessary it is, to diffinguish Times.

Whe-

174

Whether the Legiflative Power, in 1430, did well, and wifely, in reducing the Number of Electors to fuch as were worth 40 s. per Annum, (which cut off many hundred thouland Voices, and confequently many occasions of Tumults and Diforders) is not to be doubted overmuch; nor yet is to be over-confidently affirmed, because if it had been so wife and useful an Ordinance, it would have still been kept up, in its due Proportion, according to the difference of Times; altho' the Changes of such Moment are not to be frequently and lightly made. But in these Affairs, it is not fit for private People to meddle.

I have but one Thing more to offer to your Confideration, from the Accounts I have given of the different Price of Corn, and other Commodities, and then I will put an end to this long Letter : And that is, That if ever you defign to take Orders, and obtain any *Rectory*, *Vicarage*, or higher *Dignity* in the Church, you be, above all Things, careful, how you make any Composition or Agreement, for any long Space of Years, to receive a certain Price of Money, for the Corn that is due to you, altho' for the prefent it may feem a tempting Bargain, and a profitable Exchange,

change, and rid you of fome Trouble. You know not what Time may bring forth, nor what great Alterations may happen, nor what great Mischiefs you, unwittingly, may do your Succeffors. But I cannot better represent my Meaning, nor shew you the ill Confequence of fuch Agreements, than in the Words of Dr. Kennet, in his Parochial Antiquities; out of which, I will, with his Leave, and for your Sake, and for the common Benefit, transcribe a Page or two, to our present Purpose, p. 604. * For the Mischief of a dead and unimproved Allow-" ance in Money, there is a good Inflance ' cited in a Charter to the Church of Pe-' terborough (see Gunton's Hist. put out ' with great Additions by Bp. Patrick) by Walter de S. Edmundo about 1240, ' where the Abbot does grant, for God's ' Sake, and in respect to Peace, that in-" flead of the Affize for Corn, which the · Cellerarius paid him out of Belassife, he ' would hereafter accept of an Equiva-' lent, in Money, viz. for 28 Quarter ' and one Schepe (i.e. a Bushel) of "Wheat, he should receive IV. 1. XIIIs. ' IX d. by which Computation each "Quarter was then valued at 3 s. 4 d. ⁶ Had the Abbey continued, what an 11. . . un176

Chronicon Preciolum.

unhappy Bargain had it proved by this time, when the Rent must have kept ٤ ftanding at 4 l. 13 s. 9 d. whereas the 6 prefent value of the Corn, would have · been feldom less than Fifty Pounds. Such · like Prejudice was done to the Church · of Sulthorn (now Souldern) Com. Oxon. the Rector whereof used to receive from 6 ' the Abbot and Convent of Ofeney, one · Acre of Bread-Corn, growing on their ' Demein of Mixbury, and four Pence ' from their Demein of Fulewell, till 6 about the latter end of Hen. III. Robert · de Hay, Rector of that Church, agreed · to receive One hundred Shillings from ' the faid Abbey, to purchase to himself ' and Succeffors, the Annual Rent of five Shillings, in full Compensation for the ' faid Acre of Corn. 'So when Maud de " Chefny had given to the Prior and Ca-' nons of Burcester 5 Quarters of Bread-6 Corn, out of her Mannor of Heyford " (now Heyford Warine) Com. Oxon. to · be delivered yearly to them, on Condi-^c tion they fhould find Hofts, or confecra-⁶ ted Bread at the faid Church of Heyford ; when this Mannor and Church " were conveyed to New College in Oxf. " Tho. Banbury Prior of Burcester and his 6 Convent did, in 2 H. VII. A. 1486, ' release

release the faid Rent-Charge of Corn, 6 for the Confideration of fix Shillings 6 and eight Pence, yearly in Moncy; which, by this time, would have born 6 6 no greater Proportion to that quantity of Wheat, than I does to 30. When 6 ' Parish-Churches were first appropriated 6 to Religious Houses, they were sup-6 plied by Secular Priefts, who were fli-¢ pendiary Curates with the Salary of V, ¢ or at beft, but X Marks; and when by 6 the Ordination of Vicarages, this Sti-Ç pend was exchanged into a flanding C Portion of Tithe and Glebe, and Manfe, fuch Endowment was generally propor-6 6 tion'd to the Pecuniary Rate of V or X Marks, fo that the Alteration at that Ç 6 time, was no Benefit to the Prieft, only 6 as it bettered his Title, and made him 6 a Perpetual Vicar, instead of an Arbi-6 trary Curate. But confider, if the Por-' tion of the Vicar had been allotted, in ' fuch a certain Summ of Money, what ' Mendicants must our Country-Vicars ' now have been ! Whereas the Affigna-6 tion being made in improvable Land ٢ and Tithe, by this means (the value 6 of Money abating, and the rate of Land ⁶ and Commodities advancing) fome ' Vicarages, which at the first Ordina-N tion,

178

tion, had no greater . Endowment than what was equivalent to V Marks, do 6 now afford the Maintenance of 50 l. per An. Hence the Memory of Sir Thomas 6 Smith is highly to be honoured, for 6 promoting the Act in 18 Eliz. where-6 by it was provided, that a third Part of 6 the Rent upon Leafes made by Col-6 leges, should be referved in Corn, pay-6 able either in Kind or Money, after the rate of the best Prices in Oxford or " Cambridge-Markets, on the next Mar-6 ket-Day, before Michaelmass and Lady-6 Day. This worthy Knight, is faid to have been engaged in this Service, by ¢ 6 the Advice of Mr. Henry Robinson, soon 6 after Provost of Queens Coll. Oxon. and 6 from that Station advanced to the See 6 of Carlifle. And Tradition goes, that ¢ this Bill passed the Houses, before they 6 were fenfible of the good Confequences ٤ of it. We know, in the latter Times 6 of our Confusion, a Project was car-6 ried on, of deflroying the ancient Right 6 of Tithes, and converting that pious Maintenance of the Clergy, into fet-tled Portions of Money. How fatal this Innovation would have been in 6 4 G 6 time, is ingenioufly urged by two ingenious and learned Writers, (Mr. Stephens, Pref.

Thronicon Preciolum.

Pref. to Sir H. Spelman of Tithes; and Dr. Comber, Hiftor. Vindication of Tithes, P. II. C. X.) We have had ' fome Benefices in England, altered by ' fuch Method, by Decrees in Chancery, ' with a certain Summ in Money, allot-• ted in Compensation of all Tithes : ' This may feem an Eafe, and perhaps an · Advantage, upon the first Establishment 6 of it. But, unlefs the Incumbent be ٤ invefted with a Power of Revocation: 6 and as the Reason alters, can reassume 6 his Right of Tithing, I am fure, in an 6 Age or two, the Successors will fuffer 6 extreamly by fuch a Bargain. For a ' Living now, of One hundred Pounds per ٢ An. in Composition-Money, will, in a future Generation, by this stinted Re-6 venue, not exceed another Living, that is \$ 6 not, at present, of half the value, in Glebe G and Tithe. And it will then (too 6 late) appear, that the Predeceffor, who 6 complied, with fuch a Change, did not 6 confult the Interest of the Church; and 6 that fuch a Decree, did not become a 6 Court of Equity. It is very obvious to 6 confider, that nothing has been a more ٤ unjust Diminution of small Tithes, than ' the Cuftom of a Rate in Money, instead 6 of the titheable Thing in kind; tho ' fuch N 2

180

' fuch Rate, no doubt, when first impo-' fed, was equivalent to the Thing com-' muted for it, whereas they now bear · but fmall, or no Proportion to it. As, ' for Instance, in one of the old Saxon · Laws (confirmed by the Conqueror) it ' is provided, That if a Man, have one or · two Colts, he shall pay for the fall of each, one Penny, and the like for Calves; · which was a just Proportion, when the · best Colt or Calf was not valued above ' X Pence. But the Iniquity is, that this ' Cuftom does still obtain in many Pa-' rifhes; and the like minute Confidera-' tion, for Wooll and Lambs, where, for . Cuftom fake, the Trifle must be taken, ' without any Allowance for the muchadvanced value of them : by which 6 ' means, the modus Decimandi, is a growing Injury, and calls for a Relief by Law, 6 " when it shall pleate the Wisdom, and ' the Justice of our Governors. Those · eight Men of Quality and Learning, ' who were appointed at the beginning ' of the Reformation, to collect fuch Ec-^c clesiafical Canons, as ought to remain ' in force, did freely declare their Judg-' ment, That these Customs ought to be " abrogated. And the learned Dr. Cowell, ' has professed the fame Opinion, that it is

Theonicon Pecciolum.

is reasonable to take away all such Cu-' ftoms, as do lessen the Tenth Part, due to the Church of God. (the Interpreter ' in the word Tithe.) Thus far that learned and experienced Perfon, to whofe Authority I can add nothing, fince what he fays is plain and reafonable, and confirm'd by Matter of Fact. And I do heartily concur with him, in wishing the Gentlemen of the Clergy would ferioufly confider these Matters, wherever they have occasion. And thus, you see, that the Confideration of these small Matters, may be of Use, in Things of great importance. I have only to add, That I shall think my felf well paid for my Pains, if I have given you the Satisfaction you defire, and any little Encouragement to look your felf into the Antiquities of your Native Country, according to the very laudable Example of many excellent Perfons of your Famous University.
